

About SOMAH

Providing financial incentives for installing photovoltaic (PV) energy systems on multifamily affordable housing in California

SOMAH's goal is to assure equal access to solar, reduce affordable housing tenant energy burdens, and create sustainable local jobs.

Goals

300 megawatts of solar generating capacity by 2030

Reduce Energy Bills

Provide direct economic benefits to tenants in affordable housing

Funding

\$100 million annually for 10 years through GHG auction

Job Creation

Create job opportunities in a growing, sustainable industry

Eligibility

California utility and CCA customers in the service territories of PGE, SCE, SDG&E, Liberty Utilities and PacifiCorp

Potential

3,500 multifamily properties and 255K households

Incentives

Incentives can substantially cover costs associated with solar photovoltaic (PV) installation.

Comprehensive no-cost technical assistance is available throughout the project life cycle.

Community benefits

- > Direct economic savings for tenants and multifamily housing property owners
- > Clean solar power
- > Tenant education
- > Local hiring opportunities
