Elizabeth Anderson Comer / Archaeology

www.eacarchaeology.com

EAC/Archaeology, Inc. performs archaeology research, historical and prehistoric archaeological survey, testing and excavation projects, and architectural history in the US. Elizabeth A. Comer founded the company in 1983, and serves as the Project Manager and Principal Investigator. Ms. Comer has successfully completed more than 275 archaeology and architectural projects, and she has finished all projects on schedule and within budget. Working with Ms. Comer is a staff of 13 archaeologists, an underwater archaeologist, an architectural historian, and a historian. EAC/Archaeology, Inc. provides services to private and government clients and is completely familiar with the procedures and staff of the various state historic preservation offices in the eastern United States and Puerto Rico.

Past Performances

- **Archaeological Monitoring of street improvements along Potomac Street in Harpers Ferry, WV.**
Prepared for KCI & West Virginia DOT.
Recovered features documented the early history of the town improvements made by Major John Symington along the canal, and landscape modifications brought about by the realignment of the B&O Railroad. Over 1,300 artifacts were collected from the excavation.
- **Archaeological Assessment – Huntfield Development, Jefferson County, WV.**
Prepared for Dewberry & Davis, Fairfax, Virginia.
Archaeological Assessment of 516 acres for the Central Intelligence Agency.
- **Historic Archaeological Resources Management Summary – Potomac Crossing Project, Shepherdstown, WV.**
Prepared for Resource International, LTD & Deepinder Singh.
The proposed Potomac Crossing project area was believed by some local residents to be the location of a nineteenth-century house named “Bedford” and graveyard.
- **Archeological Monitoring of Park Maintenance Repair: Along the Northern Portion of the First Terrace "Harper" Gardens' Wall, Harpers Ferry National Historical Park, Harpers Ferry, WV.**
Prepared for the US Natl Park Service, Denver Service Center.
The monitoring was part of the construction management contract for the National Park Service.
