Chiltern Wispa Classic 185 Hoist

- The Hoist features a soft start and soft stop mechanism, ensuring a gentle process for both pickup and lowering.
- A Cardiopulmonary Resuscitation (CPR) function is included as a standard feature.
- The handset is equipped with a battery indicator light, providing visual feedback on power levels.
- Comfort control is available, accompanied by a display and readout functionality for user convenience.
- Users can raise and lower the device via both the control box and the handset.
- The system can achieve high lifts, including the ability to lift from floor level.
- It boasts a high battery power capacity, ensuring prolonged usage.
- The equipment is designed to be highly manoeuvrable in confined spaces.
- A hook mount with a spring safety device is incorporated for enhanced security.
- The spreader bar can rotate 360 degrees when positioned at the highest point.
- The design minimises moving and handling risks for caregivers, promoting safety and efficiency.
- The device is foldable for transport and can be done without the use of tools.
- It operates quietly, contributing to a more tranquil environment..

Introducing the Wispa PRO

Introducing the new Wispa PRO ceiling track hoist,
We offer customizable trolley sets to meet your specific track requirements.

The nickel metal hydride battery has a lifespan that is 10 times longer than a lead-acid battery, allowing for up to 100 lifts per charge.

This hoist features an increased lifting height and an electronic handset, with a pneumatic option available.

Engineered with usability in mind, the hoist is designed to minimise service time. It's easy to inspect on the track with its removable casing, and it can also be disconnected from the trolley set to lay flat on your workspace for convenient access.

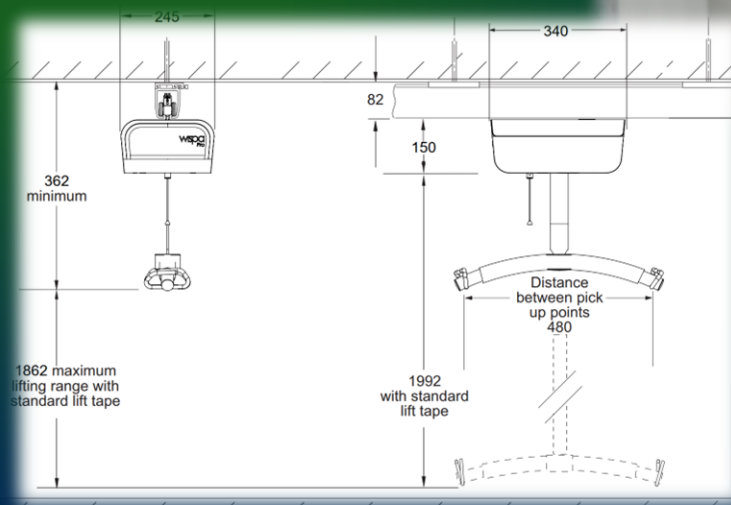

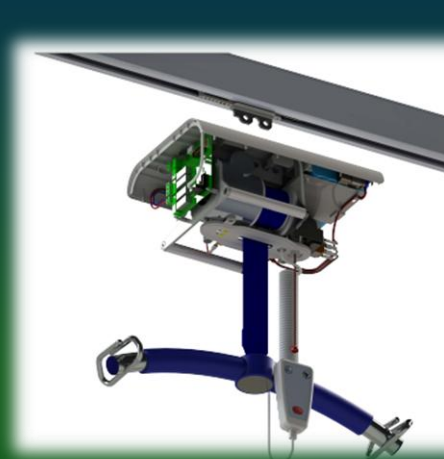

with 70kg load, 78 lifts with 130kg load, 54 lifts with 200kg load

Available in three weight capacities

- 130kg (20 stone) (286lb)
- 200kg (31 stone) (441lb)
- 300kg (47 stone) (661lb)

Power Options

- Manual or powered traverse
- In-track charger or continuous charge busbar track
- Manual and powered X-Y options

Wispa Portable 440 & T-Frame Gantry

The Wispa Portable 440 is an easy-to-operate portable ceiling lift system, which allows a single caregiver to perform transfers of patients, avoiding the stress and strain associated with manual lifting.

Flexibility to meet your care setting needs

Designed to be easy to move around and to quickly attach to a gantry or track, this portable ceiling lift can be set up wherever patient handling is required.

Max. safe working load (SWL) 200 kg / 440 lb

Unit weight (batteries included) 6.5 kg / 14.3 lb

Lifting speed 4.3 cm/s / 1.7 in/s

Folding sling hooks Reduced space for storage/transport

Electronic microprocessor Soft-start and stop motor control

Maintenance required indicator Visual LED

Lift - protection class - shock prevention Internally powered equipment

Strap length 2200 mm / 88 in

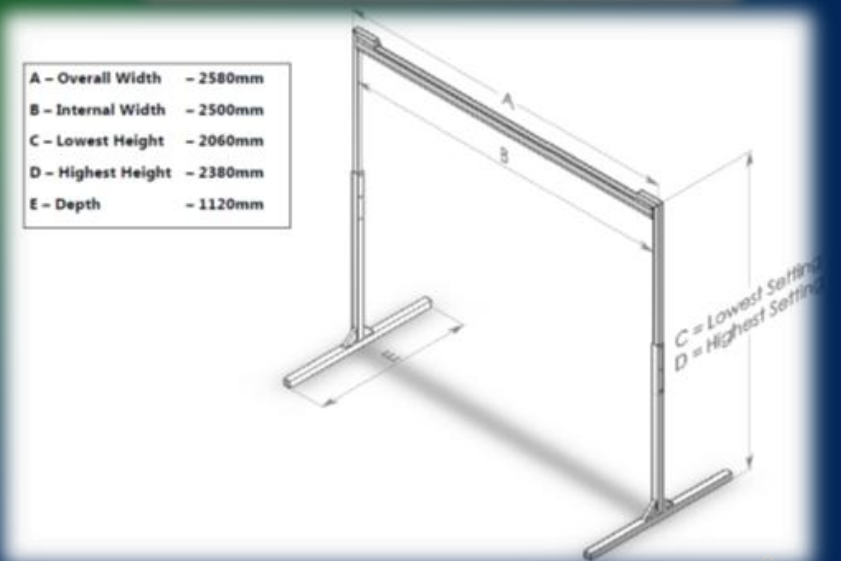

Easy Assembly Easy Use; can be assembled or disassembled by one person within five minutes. Max track length 3m.

Operates with a battery powered hoist. Versatile suits the majority of clients maximum load of 200kg (31 stones) (440lb).

Ideal temporary solution, no power supply, no installation requirement, electrical connection, or fixings and can be removed in minutes.

Totally self-supporting and independent of the building structure.

An Affordable alternative to permanent track installation.
