

ALFIE ARCTIC TURNING BED

*Better sleep. Greater comfort.
A life-changing difference.*

Alfie has Spinal Muscular Atrophy (SMA). SMA is a genetic disease that weakens the muscles and gradually reduces a person's available movement.

This limited range of movement made it especially difficult for Alfie to find a comfortable position in a standard bed. He was unable to achieve a sustained level of sleep and his parents were waking several times throughout the night to comfort and reposition him, having a negative impact on their own quality of sleep.

TRANSFORMING
SLEEP. IMPROVING
LIVES.

THE SOLUTION

These issues were resolved with the Arctic Turning Bed. The Arctic is a fully profiling bed with a wide range of turning and movement options, making it highly effective for complex needs including SMA.

“I just wanted to share with you all the joy on Alfie's face due to his new, fantastic, amazing, beautiful bed! Importantly, we (the whole family) would also like to thank you all with all the thanks in the world for making this happen.”

– Alfie's Dad

HOW THE ARCTIC HELPED

The Arctic bed can be programmed via its control box to run a series of profiling and turning options tailored to each individual's needs. Its automatic turning function provides hands-free turning at specific time intervals – ensuring Alfie remains comfortable throughout the night.

These advanced features mean Alfie can now enjoy uninterrupted and restful sleep – and so can his parents.

“Not only is this bed transforming our sleeping lives as parents, it allows our son to manage his comfort at night independently [...] It is a life changer!”

– Alfie's Dad

PERSONALISED FOR ALFIE

Alfie is a huge Liverpool Football Club fan! The Arctic bed was customised with a Liverpool FC-themed design – creating a bed that is not only clinically effective but also a unique and personal space for Alfie.

“[The Arctic] adds an amazing and unique piece of Liverpool FC memorabilia to his Liverpool cave of fandom!”

– Alfie's Dad

A POSITIVE IMPACT FOR THE WHOLE FAMILY

By reducing the need for nighttime care and significantly improving the quality of sleep, the Arctic bed has had a powerful impact on everyone in the family.

- ✓ Improved sleep quality for Alfie and his parents
- ✓ Reduced nighttime interruptions and manual handling
- ✓ More energy, better focus and improved wellbeing
- ✓ Greater independence and comfort for Alfie
- ✓ More quality time together during the day
- ✓ Enhanced safety, comfort and peace of mind

“Thank you for all of your hard efforts! We are overjoyed.”
– Alfie's Dad

CLINICALLY EFFECTIVE

Supporting a wide range of complex needs including SMA, Muscular Dystrophy, Cerebral Palsy and more.

ADVANCED TURNING SYSTEM

Hands-free turning with individual programming for safe, pressure relieving repositioning.

BESPOKE & PERSONALISED

Choice of colours, themes and custom artwork to create a bed that's as unique as the individual.

MADE IN THE UK

Proudly designed and manufactured in the UK to the highest standards.
