Program: **Agape (Young Fathers Program)** - Pronounced AH-GAH-PEH. This program is designed to aide young fathers ages 14 to 26 in understanding the complex nature of child development and the important role fathers play in the healthy development of children. Be the best dad you can be! Fathers who care for, nurture, and play with their babies raise children with higher IQs and with better language and cognitive skills. Involved fathers enhance their children’s communication skills because they tend to ask children more questions than mothers, which builds vocabulary and conversational skills.
