MARCH 2026

P31 COLD STORAGE JOINS THE HJI FAMILY, BRINGING EXPANDED SCALE WHILE KEEPING THE P31 TEAM AND SERVICE CUSTOMERS TRUST

Today we are excited to share that HJI Supply Chain Solutions has acquired P31 Cold Storage and is officially launching our Cold Storage Division. We will continue operating under the P31 Cold Storage name.

Just as important, the current P31 management team and staff will continue in their day to day operational roles, keeping the same service, responsiveness, and relationships customers already trust.

P31 adds refrigerated and frozen capacity along with flexible services that customers often need fast, including restack, cross dock, emergency storage, and order picking. Now P31 customers also gain strength behind HJI's multi-location 3PL network, proven processes, and broader team support.

"As a woman owned and second-generation family business, we are proud to welcome another woman led operation into the HJI family," said Conrad Daniels, President of HJI Supply Chain Solutions. "This is a culture fit first. We share the same core values, and we are excited to scale P31 by bringing the right infrastructure and resources across Kentucky and the region."

If you are in medical, health, or food and beverage and need reliable refrigerated or frozen storage, we would love to connect. Potential customers can learn more about P31's capabilities on the P31 Cold Storage website.
