

RED GIANT

THE NEXT BIG THING

Red Giant (REDG) is a multi-chain yield farm token that will be launched on Binance Smart Chain (BSC) and Redlight Chain (RLC). The scheduled launch date is early January 2023 for the BSC token and March / April 2023 for the RLC token.

The project will raise initial funds via a presale to accomplish the following objectives:

- Initial Liquidity
- External Investments
- Development Costs
- Marketing
- Fees Associated for Startup

At launch REDG tokens, cash staking pools and LP farms will be launched on BSC to allow daily rewards to token holders who stake or provide liquidity. The size and duration of the REDG staking pools will be fully backed by the tokenomics with multiple pools of varying durations from short-term (30 to 60 days) to multi-year (> 5 years). The amount and duration of the cash pools is dependent on the level of funding established during the Founders presale and the performance of the external investments over time. Additional BSC pools will be launched as the project grows. The project will launch on Redlight Chain within several months with the same objectives.

The initial investors (Founders) will receive their Founders tokens on each respective chain prior to public launch on the respective chains. At launch, public investors can obtain the tokens via DEX. The DEX or Launchpad for the BSC public sale will be announced in mid-December 2022 and approximately March / April 2023 for RLC.

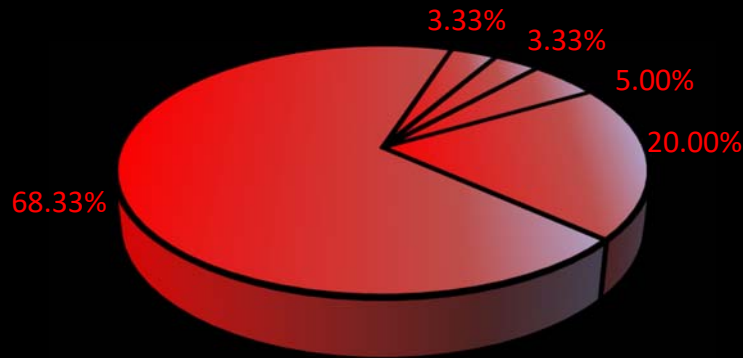

Tokenomics

V1 - 11/14/2022

Total REDG Tokens – 60,000,000

- **REDG - BSC – 30,000,000**
- **REDG - RLC – 30,000,000**

Token Distribution Percentages*

***These percentages may change slightly but not significantly**

- **Team / Liquidity - 3.33% each**
- **Contract – 5%**
- **Founders - 20%**
- **Rewards Pool – 68.33%**

BSC Chain Pairing / Taxation

- **Paired with BNB (BEP20)**
- **Buy/Sale/Transfer – 8%**
 - **6% - Rewards Pool (BNB)**
 - **2% - Auto Liquidity**

RLC Chain tokenomics will be similar to the BSC token but may be adjusted based on BSC token performance. The RLC token will be paired with REDLC.

Founders (Presale)

- \$25,000 Soft Cap
- \$90,000 Hard Cap

- Three Funding Levels (Will Receive BSC and Redlight Chain Tokens)
 - \$300 – Receive 40,000 REDG (BEP20) and 40,000 REDG Redlight Tokens
 - \$600 – Receive 90,000 REDG (BEP20) and 90,000 REDG Redlight Tokens
 - \$1,200 – Receive 200,000 REDG (BEP20) and 200,000 REDG Redlight Tokens

- Founders will receive 50% of their funding level initially. The remaining 50% is vested over the next 3 months.
 - Each Founder can choose the specific staking pool to stake the 50% token allocation being withheld. The withheld tokens always belong to the Founder; however, if the Founder withdraws the withheld tokens before the end of the three-month vesting period, a 25% tax on the withheld tokens will be imposed. Ex. – at the \$300 level, the allocation is 40,000 tokens on BSC. 20,000 will be initially allocated and if early withdraw is requested, then the Founder would receive 15,000 of the remaining 20,000 tokens.
 - RLC tokens will have the same vesting rules.

Founders Bonus Program (BSC)

A special bonus with a dedicated reward pool will be set up for the Founders that are diamond hands. At launch, a special reward pool will be established for the Founders. Every week, each of the Founder's wallets will receive a cash payout proportional to the amount invested during the Founders presale. If one or more Founders sells tokens during the first three months, those Founders will no longer receive the weekly bonus and those rewards will be distributed to the remaining diamond-handed Founders. The Founders bonus will be paid in USDT or BUSD (to be determined) and deposited to the Founder's BSC wallet.

- The estimated total bonus amount is dependent on the level of funding achieved during the Founders Presale.
 - Presale = \$25,000 >> \$200 per week
 - Presale = \$50,000 >> \$300 per week
 - Presale = \$70,000 >> \$400 per week
 - Presale = \$90,000 >> ~ \$450-\$500 per week (TBD)

Staking Pools / LP Farms (BSC)

Initial staking pool and LP farm sizes deployed at launch will be fully backed by external investments and will be proportional to the amount of capital raised in the Founder's presale.

Pools – Estimated Daily Pools Payout (based on presale levels)

- Stake REDG – Earn REDG
 - Initial Pool will pay 5,000 REDG starting on launch
- Stake REDG – Earn BUSD and USDT (more options added later based on community input)
 - Initial Pool will pay \$100 - \$250 BUSD daily
 - 7 Days after launch – New Pool will be launched paying \$100 - \$250 USDT daily
 - Pool sizes may change based on presale levels
 - Additional Pools to be added

LP Farms – Estimated Daily Pools Payout (based on presale levels)

- Stake REDG/BNB – Earn REDG starting on launch
 - 2,000 REDG Rewards Daily

Project Roadmap

- **Nov. / Dec. 2022 - Founders Presale**
- **Jan. 2023 – BSC Launch with Staking Pools and LP Farming on BSC Chain.**
- **March / April 2023 – RLC Launch with Staking Pools and LP Farming on RLC.**
- **June / July 2023 - Release of NFTs allowing staking reward boosting and other utilities TBD.**
- **Quarter 3 / 4 of 2023 – TBD**
