

ATOMIC FROG TATTOO AFTERCARE

1. Follow your artist's instructions.
2. Remove Saniderm/Bandage after 24-48 hrs in lukewarm water.
3. Wash thoroughly with an antibacterial soap (similar to unscented Dial) & warm water.
4. Gently pat dry with clean non-abrasive cloth/towel.
5. Apply a very thin coat of ointment similar to Aquaphor in the center of the tattoo and work outwards, coating the entire tattoo (Avoid smothering the tattoo) 3-4 times daily.
6. Repeat the steps above for the next few days.
7. Tattoos generally take 2-4 weeks to heal. Some scabbing may occur. **DO NOT** pick the scab. This will pull the ink and ensure the need for a touch up. Allow the scab to fall off naturally.
8. Avoid excessive sun, the ocean, swimming and or submerging your tattoo for 2-2 ½ weeks.
9. When showering, do not allow direct water pressure to hit your tattoo for the first 2 weeks. Allow the water to hit above the tattoo and roll down over it. This will prevent any irritation from the water pressure.

We want to make sure that your new tattoo looks amazing! Your proper aftercare of your new tattoo will keep it looking newer longer.

If you think your tattoo needs to be touched up, or if you have any issues with your tattoo please contact your Artist ASAP. Your Artist will tell you his/her exact policy regarding touch ups and/or guarantees.
