Eclipse fun!

Here's everyone posing with their art piece for the eclipse!

To celebrate the eclipse, we made a fun art piece using chalk pastels. First, we put a circle down on the paper and asked the clients to colour around the circle. Then once we removed the circle it created the “eclipse” effect! To enhance the circle we had them paint in white around it. It was such a fun project to do and everyone really enjoyed it!

April programs

Here is everyone posing with their final drawing.

For one of our art programs, we did a guided tutorial on drawing a cup of hot chocolate. We took it step by step using a YouTube video, which allowed the clients to take their time in creating a masterpiece! Everyone was able to make their own version of the cup and it was nice to see their personalities shine through with the stylistic choices they made.

April activities

In April we had some very fun activities. We were able to go on nice weather walks to get some fresh air and exercise, we played floor hockey during fitness for a change which they really loved, and of course grocery shopping as usual!

April programs

Another art program we did involved making a personalized dream catcher. This activity was a very tactile craft which required the clients to put a lot of focus into it. They had to feed the string through the holes to create a pattern in the middle, then they were able to decorate with feathers and beads to add their own flair.

One of the lovely dream catchers hung up at Tania's Place.
