

Sandeep Dixit

CEO & Founder

PMP, CA(I), Certified Oracle Implementation Specialist

Personal Profile

- Sandeep has 25+ years of work experience, having started as an Auditor, Head of Accounts & Finance and developed into a Business Solutions expert. He has hands on, Managerial and Practice Leader experience, which has given him deep knowledge and expertise, in areas integrated with ERP systems, Business Intelligence, Data analytics, Risk Management, Change Management, Business Systems, Accounting & Finance, Financial Reporting, Financials Statement Disclosures, Compliance and Internal Controls Certification.
- Over Sandeep's years of consulting experience, he has focused on "excellence in delivery and exceeding customer expectations". He has converted most his clients into reference clients.
- He has led and managed medium and large size teams as Head of Accounts & Finance, Major Systems implementations that were either in Canada / US or Global business transformation Projects. These projects have generated billing revenues ranging from \$500K to over \$20 Million.
- In his overall work experience, he has gained extensive experience in finance diagnostic and transformation projects with core expertise in designing/standardization of Chart of Accounts, Multi-currency, Consolidations, Billing, Asset Management, Project Costing, Business Intelligence, Data analytics and Management Reporting.
- His focus and emphasis have been on quality, enhancing productivity/improving efficiencies resulting in improving top line and bottom-line numbers.
- He has several years of experience in Business Systems Implementation with Oracle in the areas of HCM on Cloud, Finance, Distribution, Logistics and transportation, Capital Asset Management & Construction, Real Estate, Construction and Property Management. These implementations were Net new or Upgrades, addressing changing business environments and resolving core business strategies and delivered key benefits.
- He has also built methodologies for software selection and assessment projects for small and medium sized clients. These were converted into implementation of recommendations for digital and finance transformations

including e-commerce solutions, point of sale (POS) systems and ERP systems like Oracle EBS Cloud, NetSuite, Quick Books, Sage 50 / 300 and Just Food (food industry specific). These transformations delivered value to clients on the investments made.

- Currently enrolled in Harvard Business Analytics Program (HBAP) being offered by Harvard Business School covering data science and analytics related to Digital, Operations and Supply Chain Management. The program covers detailed learnings on Leadership, Innovation and Change and how to use data science and analytics in improving the overall operations and financials of an organization.

Industry Verticals

- His Industry vertical experience spans across Not-for-Profit, Manufacturing, Financial Services, Pharmaceuticals, FMCG, Telecommunications Food manufacturing and distribution, Metals and Mining, Energy & Utilities, Government, Public Sector, Real Estate, Hospitality, Engineering & Construction.
