

VacuSystems

In-Built Innovation!

Vactronic Vacuum and Mopping Robot

Dust and dirt are automatically transported to your central vacuum system.
The robot vacuum cleaner with mop has different cleaning modes that can be set with the help of the control app for your mobile phone or tablet.

The robot docking station has an automatic self-emptying function that empties dust and dirt directly into the suction socket of your central vacuum cleaner and then charges the battery.

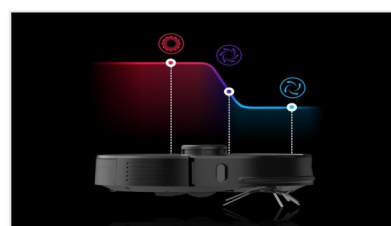

Robot vacuum cleaner with adjustable suction power 2,700 PA

Suitable for hard floors and carpets

Easy app control with iOS or Android

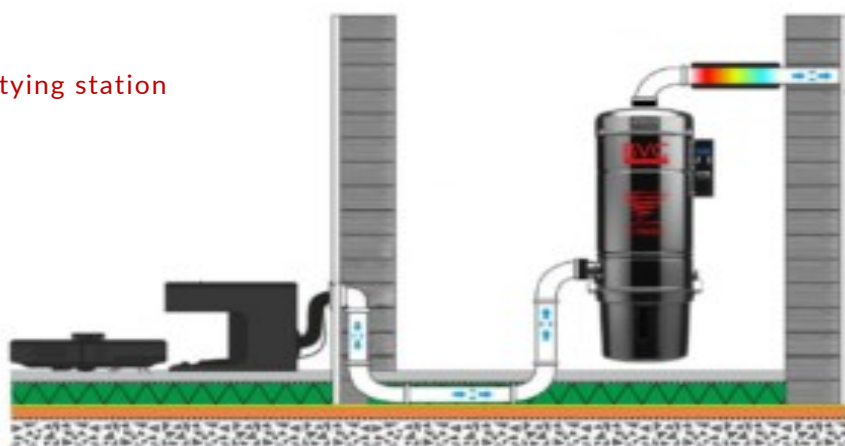

Robot vacuum cleaner with mopping function

Suitable for traditional and retractable hose systems!

An automatic loading and emptying station
