

CONSULTATION

1 Hour On-site walkthrough with the client. Going over the scope of work and examining the site.

DISCOVERY CALL

Initial phone call. Typically 30 min or less. Short descriptions of project and how we can be the best service to you.

SCHEMATIC DESIGN

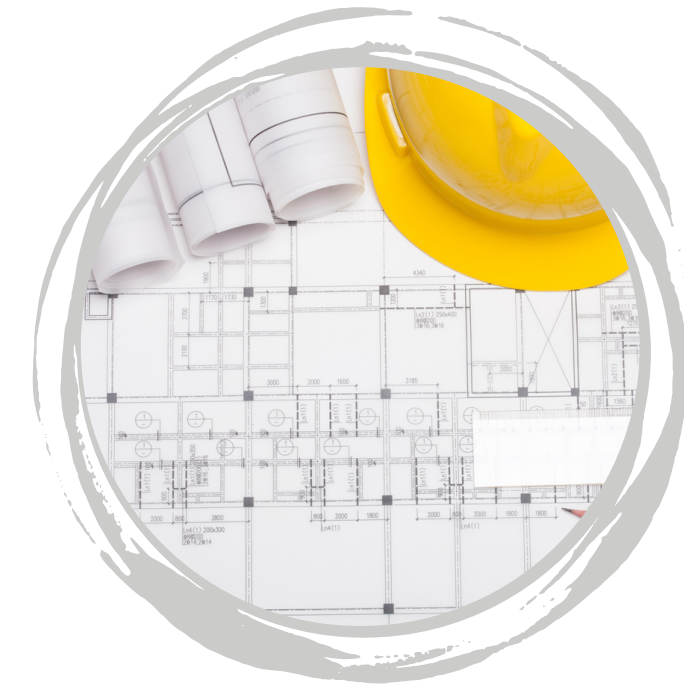

(Phase 1) On-site measurements of space. (if it is an existing location.) Programming, and initial design schematic.

CONTENT DEVELOPMENT

Problem solving, modifications, and final sourcing stages.

DESIGN DEVELOPMENT

(Phase 2) Program is approved, along with schematic design and is further developed in this phase. All parties involved must have clear communication & understanding of design intent being sought out.

CONSTRUCTION DOCUMENTS

(Phase 3) Approved design is translated into construction documents for contractors. All specifications for executing interior design projects are included. Approved construction documents are processed for cost estimation.

CONSTRUCTION

(Phase 4) Construction begins with compliance of specifications in the documentation set. The design intent is ensured with the on-site construction.

FINAL WALK-THROUGH

(Phase 5) Final punch-list and touch-ups are to be completed.

MAINTENANCE

Touching base with clients.
Assisting with any future projects.
