Drone Seva

Hal Center is a comprehensive provider of drone services, offering sales, rentals, training, repair, and maintenance. We facilitate drone delivery, spraying for agriculture and pest control, mapping, industrial applications, and professional drone photography. With our Digital Smart Kiosk, Hal Center ensures accessibility to these services for farmers, retailers, brands, logistics providers, self-employed individuals, and government institutions, contributing to the vision of Digital Bharat and Developed Bharat by leveraging advanced technology at the grassroots level.

Farming Support

Hal Center provides a wide range of farming support services to empower farmers, including crop health monitoring, advisory, marketing, agri input sales, finance, insurance, pathlab and soil testing, storage, transportation, manpower, irrigation automation, and equipment rental. These services aim to optimize yields, connect farmers with buyers, and streamline agricultural operations, contributing to the growth of Indian agriculture.

E-Commerce

Under the Hal Suvidha app, Hal provides a diverse range of services including grocery, pharmacy, automobile, stationery, lifestyle products, electric and electronic appliances, food delivery, and booking, rental, and stay options. This comprehensive platform offers convenient access to essential goods and services, enhancing the daily lives of its users.

Digital Governance

Hal Center acts as a crucial link between government and citizens by connecting various services, including government schemes facilitation, direct benefit transfer, government surveys, display advertising, telemedicine, digital citizen initiatives, ONDC, and other initiatives, as well as digital public infrastructure. Through its platform, Hal Center facilitates easy access to these services, ensuring efficient delivery and enhancing citizen engagement with government programs and initiatives.

Rural Marketing

Hal Center provides a range of rural marketing initiatives, including acting as a remote presence and channel partner for brands, forming sales and distribution partnerships, conducting display advertising and brand promotion, facilitating market research and digital surveys, establishing ground support partnerships, ensuring user authentication and KYC compliance, as well as offering project partnership and execution support. These services aim to bridge the gap between rural communities and brands, enabling effective marketing strategies and enhancing rural development.

Hal Center

Hal Center generates employment through rural entrepreneurship by opening Drone Centers that connect retailers, brands, logistics, and farmers in one place. By establishing Hal Centers in rural areas, entrepreneurs can earn a decent income by providing services and facilitating connections between various stakeholders. These centers serve as hubs for economic activity, creating job opportunities and fostering local development.
