Why Offer Protection Plans to Your Customers?

Equipment Is Designed to Outlast the Warranty

Help your customers protect their home medical equipment long after the warranty expires and avoid post-warranty customer issues.

Accidents Happen: Even to the Most Careful Customers

Drops and spills are part of life but aren't covered under the manufacturer's warranty – leaving your customers exposed without our accident coverage.

Robust Protection Plans Help Increase Equipment Sales

Research indicates that customers are more likely to make large purchases when offered trusted protection options.

MedGuard Protection Plans are designed to increase customer satisfaction and provide peace of mind for both you and your customers.
