

Evanston Valley Enterprise, Inc
Turning Brown to Green

Evanston Valley Enterprises, Inc.

Capability Statement

Overview:

Evanston Valley Enterprise, Inc. (EVE) was founded in 2014. The company introduced a way to reuse materials that are usually considered waste by using wood chips from their own tree service by blending that with old hay from local farmers and leaves from some municipal pickup services. We then windrow all that together and turn as needed based on our measurements.
