Hageman Votes to Gut Healthcare and Food Assistance for Wyomingites to Fund Tax Breaks for Billionaires

Rock Springs - WDP Chair Joe M Barbuto has issued the following statement in response to House Republicans passing Trump's disastrous budget bill.

"House Republicans passed a bill that kicks Wyomingites while they're down — and Harriet Hageman is bragging about it.

She voted to take healthcare away from thousands of Wyoming families, knowing full well that our rural hospitals are already struggling to survive. She voted to slash food assistance, knowing nearly 30,000 Wyomingites rely on it to get by. She voted to cut essential services for seniors and veterans — *all so billionaires and political donors can get another tax break they don't need.* It's disgusting.

Harriet Hageman isn't even pretending to give a damn about the people she was elected to represent. She's not here for us — she's here for Trump, the donor class, and her own political ambition. If you were still holding out hope that she might ever put Wyoming first, let this vote be the wake-up call. She told us who she was. We need to believe her.

This bill will hurt our neighbors. It will make it harder to put food on the table, to get to the doctor, to retire with dignity. And for what? So the ultra-wealthy can pad their portfolios while the rest of us are told to tighten our belts?

We deserve better. And Democrats in Wyoming are going to keep fighting — fighting for working families, for fairness, and for a future where people like Harriet Hageman don't get to sell us out without consequences."
