Harriet Hageman Just Sold Out Wyoming Families

Cheyenne, WY— In response to Republican Representative Harriet Hageman voting for the GOP's cruel, immoral budget that will gut health care, close rural hospitals, and devastate Wyoming communities, Wyoming Democratic Party has released the following statement:

It's hard to believe that Wyoming's lone Representative would vote for a bill so completely destructive to the state and people she represents, but moments ago, Harriet Hageman did just that. The GOP's budget bill will strip healthcare from thousands of her constituents, close rural hospitals across the state, and make it harder for working families to put food on the table. Hageman simply does not care.

"Congresswoman Hageman and her GOP colleagues have failed us by siding, as they always do, with special interests in service of a corrupt President. We will not forget the moment when Republicans decided their rich friends are more important than everyone else with this vote," said WDP Chair Lucas Fralick.

Between the devastating cuts in the GOP's Big Ugly Betrayal and the massive fiscal hole the Wyoming Freedom Caucus has already blown in our state budget with their tax cuts and unconstitutional school voucher scheme — quite frankly, Wyoming is screwed. And there's only one reason — so that the rich can stuff even more money in their pockets.

Democrats fought valiantly every step of the way to try and stop Donald Trump and Republicans from doing this to the country, and so did the good people of Wyoming. When flooding their phone lines and emails, showing up at their offices and town halls, and getting out in the streets doesn't work, we have a big problem with our representatives.

Wyoming deserves better. We won't give up. And if you're ready to fight back, Democrats are here for you. Get involved, run for office, and help us take this state back from the politicians who've sold us out.
