

© 2021 Discover MAGIC 

Let's make a magic wand **APPEAR!**

1. Cut out the three pieces above along the dotted lines.

2. Arrange the pieces so you can count 8 magic wands.

3. Take the two smaller pieces on top and switch their places.

4. When you line up the wand tops with the wand bottoms, a wand will seem to magically appear.

Watch [Brian Scott Magic episode 1 - Imagination](#) to see this illusion in performance.
