## Dog Walking Benefits

Dog walking is beneficial for dogs of all ages.

A few general benefits are as follows:

- \*Mental stimulation: to help reduce destructive behavior
- \*Physical health: To maintain weight or if obese burn some extra calories. Also, it helps with bones, joints, and muscle health.
- \*Improved Digestion: Regular walking and exercise can help regulate the digestive tract. This means this can help them go to the bathroom on a more regular basis.

A few benefits for different life stages:

\*Puppies: Need mental stimulation or they revert to destructive behavior. Also, their bones are growing and really need a balanced routine within their means. Otherwise, you can jeopardize their development. A good rule of thumb is about 5 minutes of exercise per month of the puppy's age. So, for a 3-month-old pup they might only be able to handle a 15-minute walk or less. Many factors do factor into that including their breed. So, please check with your vet.

\*Adult Dogs (1yr to 7yrs): Regular walks help them maintain healthy weight or if they need to burn calories to lose weight. It helps with mental stimulation, bone & joint health, muscle health, and helps with digestion too.

\*Seniors: They need regular walks to keep them strong and less stiff from arthritis. It's much easier for elderly pets to have muscle atrophies. So, regular walks keep the muscles stronger and bones/joint moving more fluid. Also, elderly pets are known to have more UTI's. So, more frequent bathroom breaks are beneficial for them.

## Service Details

- We provide a 30 minute walk (Weather Permitting) When it's over 90 or under 40 degrees walks are shortened & we have play-time inside. Continued next page...

- We always pick up after your pet(s), you provide the bags.
- Replenish water/food (if they need a lunch time feeding)
- Playtime, attention, loving, and even brushing if requested.
- Give Owner Approved Treats before we leave.
- We do not do pack walking, it's just your dog(s) we will be walking, we spend quality time at each person's house.

## PET SITTING

## What Does a Pet Sitter do?

When you go on vacation or take a business trip, Your pet will have their own personal attendant. A person who takes care of your pets as if they were our own pet(s). We will keep them on their normal routine, such as feeding schedule, eating their own food/treats, walking on their same routes, and sleeping in their normal familiar spots. Pets are happier in their own home than a strange place. Therefore, It reduces their stress levels and illnesses since the pet sitter comes to your house; there are no other pets around that could cause an outside illness, such as kennel cough which is very contagious even if your pet has been vaccinated against it they can get it as there are so many different strains of it, it's like a flu for dogs basically.

Hiring the Animal Sitter and Dog Walker, LLC also has many other advantages vs. having a friend or neighbor watch your pet while you're away. We will make sure your pet(s) are safe, comfortable and HAPPY. We love what we do, our clients often tell us they can tell a difference in their pet's happy and relaxed behavior when they return home, it's like they were never gone.
