THE FOUNDING EDITOR
SCIENCE SHORE

“Science of today is the technology of tomorrow”. My friend has taken a great step towards combining Science and Arts together in a single platform to enrich the knowledge of people of all sectors. I find science shore special as the contributors are from different ages and we get plenty of innovations from the diverse age group. I whole heartedly congratulate the entire team for the efforts they contribute in bringing this magazine as a successful one. The videos of experts and children are really thought provoking. I wish that the magazine will surely bring out eminent writers in the mere future. Hearty Congratulations for the First Anniversary.

GOOD LUCK!

Regards,
