

CAPABILITIES STATEMENT

Diverse Controls, Inc. specializes in the setup, installation, programming, and engineering of Building Automation Systems (BAS) as well as Total Room Automation (TRA) for integrated lighting/shading. We use IT network and cyber security best practices on your Operational Technology (OT) network to ensure a secure and consistent HVAC environment.

We offer full services to carry a controls project from pre-design through design, installation, and final commissioning. With over 35 years of combined experience in the building controls industry, our remote and on-site support ensures your environments are running exactly as intended.

CORE COMPETENCIES

Diverse Controls, Inc. embraces evidence-based and established best practices in all aspects of our install related to building controls and cyber security. We achieve this by remaining passionate about and well-informed on new technologies that maintain our guiding principles while continuously improving the equipment we offer, the processes we follow, and the design of your building.

Diverse Controls, Inc. responds to a demand for more efficient controls construction practices in Iowa. We have experience with many small-medium businesses ranging from hotels and schools to pharmaceutical facilities, office buildings, and corporate headquarters.

KEY DIFFERENTIATORS

Guardian Service

Mitigate 100% of your IT-related risk with built-in cybersecurity.

- + Web security certificates
- + Device security certificates
- + Long passwords
- + Multi-Factor Authentication
- + Customized OT network, Airgap
- + Encrypted remote access tools

Integrated Front-End

Spend less time researching and correcting issues with our organized menus, upgraded alerts, and issue tracking. Our open architecture installations deliver secure enterprise level access to your BAS with a small business feel — and price.

Customer Service

Using our remote access tools allow us to check on issues at a moment's notice, determine a remediation plan, and get issues resolved quickly. Increasing satisfaction and reducing costs.

COMBINE + CONQUER

Diverse Controls, Inc. merges intricate knowledge and expertise of control systems with IT/OT networking and a cybersecurity-first mindset.

Our remote access system allows our customers to integrate all of our capabilities into a single, secure, web-based application. It's a fast, secure, air-gapped connection with zero local IT support requirements. With 24-7 monitoring, we ease your systems into the state they were designed to function at:

OPTIMAL EFFICIENCY
