

## Workshop 6: Operationalize Data Science

### Deploy Data Science across your Business

#### Objectives

Introducing delegates to:

- an overview to Operationalizing Data Science, with worked examples of the various configuration tasks aligning
- modules of Data Science as deployed within your organisation (customised)

#### Description

This workshop introduces the delegates to Operationalizing Data Science and is customised to reference those modules that your business has installed.

Delegates are trained to operate the system as per their roles and responsibilities, and specifically on those modules which are assigned to their logon credentials.

#### Outcome

Delegates will leave the workshop with a PDF report of their analysis, enabling them to return to work with insights and an actionable plan.

#### Topics \*

1. Introduction to Operationalizing Data Science
  - 1.1. Enterprise Manager overview
  - 1.2. Terms & definitions
  - 1.3. Permissions
