Instant Rewards

For every transaction in the Babyloop network a 3% fee is distributed to existing holders in \$LOOP rewards. That means you earn more \$LOOP just by holding Babyloop in your wallet. Watch your \$LOOP grow every transaction!

Locked LP

Liquidity tokens are burned and locked. Additionally, 3% of all transaction fees are added to liquidity.

Here you can view LP holders:

04 Babyloop Protocol

Babyloop employs 4 simple functions: Rewards + LP acquisition + Burn + Marketing. In each trade, the transaction is charged a 12% fee, which is split 4 ways.

3% fee = redistributed to all existing holders

3% fee is split 50/50 half of which is sold by the contract into BNB, while the other half of the Babyloop tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

5% of every Babyloop Transaction goes to the marketing wallet which is used as marketing funds to advance our mission of being the BIGGEST and the BEST baby project on the BSC!

1% of every transaction is automatically burned. This ensures our chart has healthy growth by reducing the circulating supply and therefore making each token worth more!
