About Us

Company Overview

Kentan Corporation, formerly known as **Kentan Industrial Supply and Services**, embarked on its journey in 2014 as a sole proprietorship company dedicated to fulfilling the air compressor and pneumatics system needs of various industrial sectors. Over the years, our commitment to quality, innovation, and customer satisfaction has propelled us towards significant growth and evolution. Today, we stand on the threshold of a new phase as we transition into **Kentan Corporation**.

In 2017, Kentan embarked on a strategic expansion initiative, establishing operational offices in key cities across the Philippines. With branches in Davao, Cagayan De Oro, Cebu, and Cavite, we have cemented our presence nationwide, ensuring prompt and efficient service delivery to our valued clients wherever they may be.

Vision:

We envision Kentan Corporation as the undisputed one-stop shop for all steam generation and air compressor system requirements in the Philippines. Driven by a passion for excellence and commitment to surpassing industry standards, we are dedicated to continually evolving and innovating to meet the evolving needs of our clients and the dynamic landscape of the industrial sector.

Mission:

At Kentan Corporation, our mission is to be the premier provider of comprehensive steam generation and air compressor solutions in the Philippines. Through relentless dedication to excellence and innovation, we strive to exceed the expectations of our clients and stakeholders while contributing to the growth and development of the industries we serve.

About Us

Company Overview

Air Compressors and Pneumatic Systems:

Our foundation lies in providing top-of-the-line air compressor and pneumatics systems tailored to the specific needs of manufacturing, food and beverage, power generation, and other industrial plants.

Steam Generation Systems:

Recognizing the evolving needs of our clientele, we have expanded our offerings to include a wide array of steam generation solutions. From boilers and burners to valves and specialized products, we cater to the diverse requirements of industries ranging from manufacturing, food, healthcare to hospitality.

Strategic Partnerships:

Kentan Corporation prides itself on fostering strategic partnerships with both local and international purveyors of cutting-edge technology and equipment. These collaborations not only enhance our product offerings but also enable us to widen our reach and penetrate new markets, including the burgeoning food and hospital industries.

At **Kentan Corporation**, excellence is not just a goal but a way of life. We are committed to upholding the highest standards of customer service, technical expertise, and professionalism in every facet of our operations. By prioritizing the needs and aspirations of our clients, we aim to forge enduring partnerships built on trust, integrity, and mutual respect.

As **Kentan Corporation** embarks on this exciting new chapter in its journey, we invite you to join us in shaping the future of steam generation and air compressor solutions in the Philippines. With a steadfast commitment to innovation, quality, and customer satisfaction, we are poised to redefine industry standards and carve a niche as a beacon of excellence and reliability. Welcome to the Kentan Corporation family, where your success is our priority.

**KENTAN
CORPORATION**

Core Values

At Kentan Corporation, we are guided by strong principles that shape our culture, decisions, and way of doing business. These principles drive our commitment to ethical practices, customer-focused solutions, proactive execution, and continuous improvement. Through disciplined leadership and responsible stewardship, we strive to build lasting partnerships and deliver value to our clients, stakeholders, and the communities we serve.

Integrity

We conduct our business with the highest ethical standards, guided by honesty, transparency, and accountability in every decision we make. We honor our commitments, comply with laws and regulations, and act responsibly toward our clients, partners, employees, and communities. Integrity is the foundation of trust that drives our long-term relationships and sustainable success.

Excellent Customer Service

We are committed to delivering exceptional service by understanding our customers' needs and consistently exceeding their expectations. Through responsiveness, reliability, and continuous improvement, we build strong, long-term partnerships and provide solutions that add lasting value to our customers' businesses.

Action Oriented

We take initiative and act decisively to turn plans into results. By embracing accountability, urgency, and proactive problem-solving, we drive continuous progress and deliver timely, effective solutions that support our organizational goals and customer commitments.

Innovation

We foster a culture of continuous improvement by encouraging creativity, adaptability, and forward-thinking. Through innovation, we develop effective solutions, enhance operational excellence, and embrace new technologies and ideas to create sustainable value for our customers and stakeholders.

Godly Fear

We uphold our responsibilities with reverence, humility, and moral discipline, recognizing a higher standard that guides our actions. This value strengthens our commitment to ethical conduct, accountability, respect for others, and responsible stewardship in all aspects of our business.

STEAM BOILER

The Fungkuai Steam Boiler is a high-performance industrial boiler engineered to deliver stable, efficient, and reliable steam generation for a wide range of industrial applications. Designed with advanced combustion technology and robust construction, this boiler is ideal for facilities that require continuous steam supply with optimal fuel efficiency and operational safety.

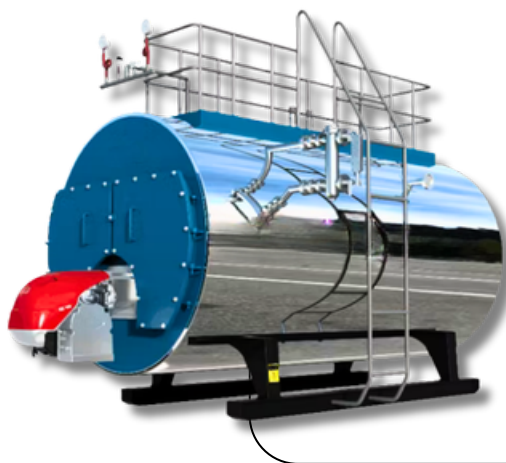

This boiler features a horizontal fire-tube structure with a compact cylindrical body, ensuring excellent heat transfer and uniform pressure distribution. The pressure vessel is manufactured using high-quality steel plates, precisely welded and tested to meet international safety and quality standards. Its insulated outer casing minimizes heat loss, improving overall thermal efficiency while maintaining a clean and professional appearance.

The unit is equipped with an integrated platform, ladder, and safety railing, providing safe and convenient access for inspection, operation, and maintenance.

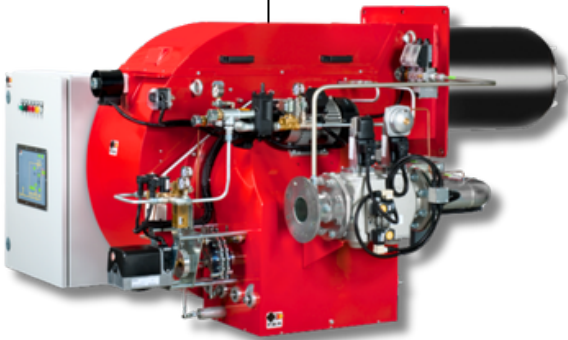

The Yuanda Steam Boiler is designed to deliver efficient, stable, and reliable steam generation for a wide range of industrial applications. Built with robust construction and proven boiler technology, it ensures consistent performance, high thermal efficiency, and safe operation. Its compact design and dependable output make it ideal for manufacturing, processing plants, and commercial facilities requiring continuous steam supply.

Kentan Corporation supplies and fabricates Yuanda Steam Boilers, providing trusted engineering support, quality workmanship, and dependable after-sales service to meet industrial steam requirements.

BURNER

The FBR Industrial Burner delivers reliable, high-performance combustion for a wide range of industrial heating applications. Engineered with precision Italian technology, it provides stable flame control, efficient fuel consumption, and quiet operation. Its compact and robust design allows for easy installation, low maintenance, and long service life—ideal for boilers, furnaces, and process heating systems.

Kentan Corporation proudly supplies FBR burners, ensuring dependable solutions backed by trusted expertise, technical support, and quality service for industrial customers.

— weishaupt —

The Weishaupt Industrial Burner is engineered for precision, efficiency, and long-term reliability in industrial heating applications. Known for German-quality design, it delivers stable combustion, low emissions, and quiet operation while maintaining high performance. Its compact, durable construction allows for easy integration with boilers and thermal systems, ensuring consistent and efficient heat output.

Kentan Corporation supplies Weishaupt Industrial Burners, providing customers with trusted combustion solutions supported by technical expertise, quality installation, and dependable after-sales service.

RIELLO

Riello is a globally recognized brand known for innovative, reliable, and energy-efficient combustion and heating technologies. With decades of engineering excellence, Riello products are designed to deliver precise control, consistent performance, and reduced emissions across a wide range of industrial and commercial applications.

At Kentan Corporation, we proudly supply a wide selection of Riello products, offering dependable solutions supported by technical expertise, quality service, and trusted industry experience.

AIR COMPRESSOR

KOBELCO

Kobelco is a globally respected Japanese industrial brand and part of the Kobe Steel Group, with more than a century of engineering heritage in compression and mechanical systems. Best known for its advanced industrial compressors and rotating machinery, Kobelco delivers high-performance solutions designed for reliability, energy efficiency, and long-term operational excellence in demanding industrial environments.

At Kentan Corporation, we proudly supply Kobelco compressor solutions and accessories in the Philippines, offering trusted products that support efficient compressed air systems for manufacturing, processing, and utility applications nationwide.

DENAIR

Denair Energy Saving Technology (Shanghai) PLC is a globally recognized manufacturer of energy-efficient compressed air systems, providing advanced solutions for various industrial applications. Established in 1998, Denair specializes in the research, development, and production of rotary screw air compressors, oil-free air compressors, portable compressors, vacuum pumps, air dryers, and filtration systems.

Denair products are designed for high performance, reliability, and energy efficiency, meeting international quality standards such as ISO and CE certifications. With a strong global presence in over 100 countries, Denair supports industries including manufacturing, food and beverage, pharmaceuticals, mining, and power generation.

Kentan Corporation is one of the authorized distributors of Denair products in the Philippines, offering a complete range of compressed air solutions along with technical support, installation services, and after-sales maintenance to ensure optimal system performance and long-term operational efficiency.

AIR CONDITION

Daikin is the world's leading manufacturer of advanced air conditioning, heating, ventilation, and indoor climate solutions, trusted in more than 140 countries for over 90 years of engineering excellence. Known for innovation, energy efficiency, and superior comfort performance, Daikin delivers a comprehensive range of HVAC technologies designed to meet the needs of residential, commercial, and industrial applications.

Through Kentan Corporation, Daikin products are supplied in the Philippines to support residential, commercial, and industrial HVAC requirements. Our Daikin solutions are selected to deliver optimal thermal comfort, energy efficiency, and system reliability for both standard and project-based installations.

• Residential & Commercial Air Conditioning

Daikin's broad lineup includes energy-efficient split-type and multi-split AC units suitable for homes, offices, retail spaces, and commercial environments. These systems integrate advanced inverter technology for precise temperature control, quiet operation, and reduced energy consumption.

• VRV / VRF Systems

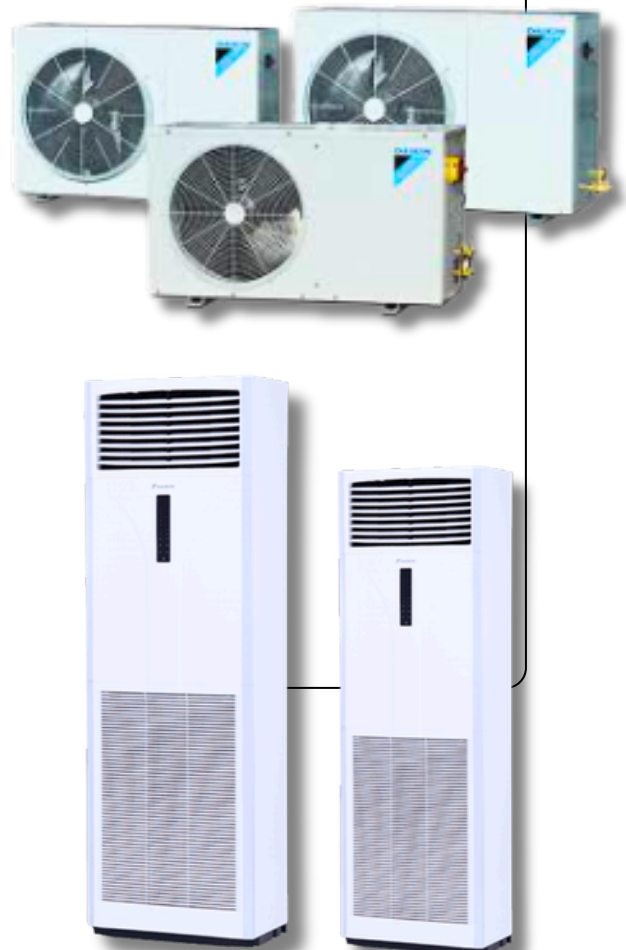

Variable Refrigerant Volume (VRV) systems offer scalable, flexible climate control for larger buildings and mixed-use facilities, enabling individual zoning and excellent energy performance for diverse spaces.

• Packaged & Applied HVAC Solutions

Daikin's packaged air conditioners, water-cooled and air-cooled chillers, and industrial HVAC systems deliver robust, efficient cooling and heating for large commercial buildings, data centers, and process environments. These solutions are engineered for durability, operational stability, and optimized energy use.

• Indoor Air Quality & Smart Controls

Daikin also supplies air purification technologies and smart control systems that enhance indoor comfort and safety, helping users manage climate settings with ease while improving air quality and energy performance.

SPAREPARTS & ACCESSORIES

Yoshitake is a globally respected Japanese manufacturer of high-quality fluid control and regulating valves, with more than 70 years of engineering expertise in steam, water, and process systems. Specializing in reliable pressure control and fluid management solutions, Yoshitake products are engineered to improve safety, energy efficiency, and operational performance across industrial, commercial, and building applications worldwide.

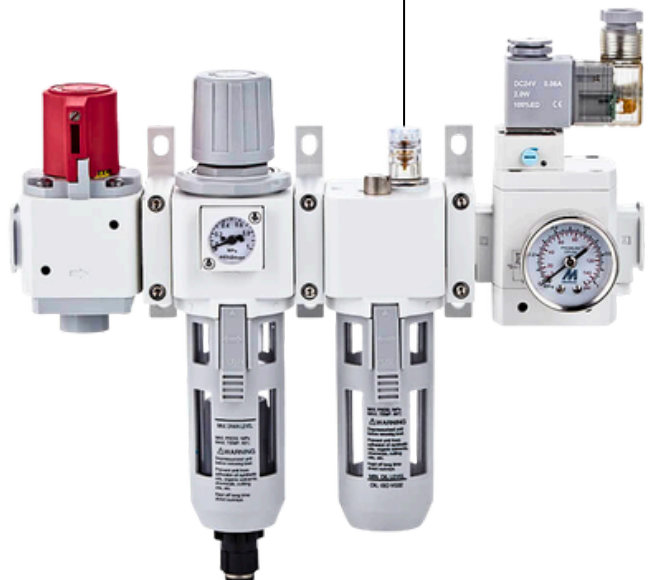

At Kentan Corporation, we proudly supply Yoshitake products in the Philippines, including steam traps, pressure reducing valves, solenoid valves, sight glasses, and a diverse range of precision fluid control components to support safe, efficient, and durable system operation.

Mindman Industrial Co., Ltd. is a globally recognized manufacturer specializing in high-quality pneumatic and automation components. With a strong focus on innovation, precision engineering, and reliability, Mindman provides a comprehensive range of products designed to meet the demands of modern industrial applications.

Their product lineup includes air cylinders, solenoid valves, air preparation units (FRL), electric actuators, vacuum components, and fluid control systems. Built to deliver consistent performance and long service life, Mindman products are widely used in industries such as manufacturing, packaging, automotive, electronics, and process automation.

Backed by advanced manufacturing technology and strict quality control standards, Mindman ensures each product meets international certifications and performance expectations. Their commitment to continuous improvement and customer satisfaction makes them a trusted partner for efficient and cost-effective automation solutions.

SPAREPARTS & ACCESSORIES

Danfoss is a world-leading brand in industrial controls, valves, and automation solutions, trusted for its precision, reliability, and energy-efficient technologies. Designed to meet the demands of modern industrial systems, Danfoss products help optimize performance, improve safety, and enhance operational efficiency across heating, cooling, and process applications.

Kentan Corporation proudly supplies a wide range of Danfoss products such as, Pressure Switches and Sensors, Control Valves and Solenoid Valves, Temperature Controls and Thermostats, Industrial Automation and Safety Controls Components for Boiler and Burner Systems delivering dependable components backed by technical expertise, quality support, and proven industry experience.

Suntec Industries is a globally trusted brand specializing in high-quality fuel pumps and fuel system components for oil-fired burners and heating systems. Known for precision engineering and consistent performance, Suntec products are designed to deliver accurate fuel flow, reliable pressure control, and long-term durability in demanding industrial and commercial applications.

Kentan Corporation supplies Suntec Industries products such as Oil Burner Fuel Pumps, Single-Stage and Two-Stage Pumps, Fuel Pressure Regulation Components and Accessories for Industrial Burner Systems.

DUNGS is a globally recognized brand specializing in combustion control and gas safety systems for industrial and commercial applications. Renowned for precision engineering and high safety standards, DUNGS products ensure reliable gas regulation, accurate pressure control, and safe burner operation across a wide range of heating and process systems.

Kentan Corporation proudly supplies DUNGS Combustion Control products, delivering trusted safety solutions supported by technical expertise, quality service, and dependable after-sales support.

SPAREPARTS & ACCESSORIES

SIEMENS

Siemens is a globally established leader in industrial automation, electrical engineering, and control technologies. Its solutions are widely recognized for engineering excellence, operational reliability, and long-term performance across industrial and infrastructure applications.

Kentan Corporation supplies selected Siemens industrial products, providing clients with high-quality automation and control solutions supported by professional technical expertise, dependable service, and strong after-sales support.

Honeywell

Honeywell is a global technology and manufacturing leader delivering advanced solutions that improve efficiency, safety, and sustainability across industrial, commercial, and infrastructure markets. With more than a century of innovation, Honeywell provides cutting-edge automation, control, sensing, and safety technologies used worldwide in energy, manufacturing, buildings, and aerospace applications. Renowned for reliability and performance, Honeywell solutions help customers optimize operations, reduce risk, and achieve long-term operational excellence.

Aquametro is an established international provider of high-precision measurement and control solutions for thermal energy, water, and fluid systems. With a strong foundation in Swiss engineering, Aquametro delivers reliable and accurate metering, monitoring, and balancing technologies designed to enhance energy efficiency, operational transparency, and long-term system performance across commercial and industrial applications.

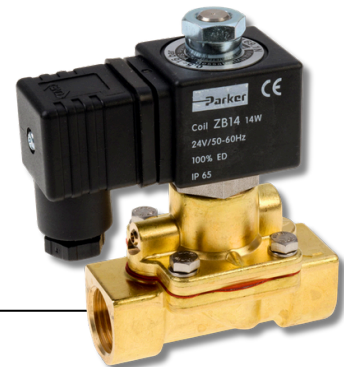

SPAREPARTS & ACCESSORIES

Allanson is a trusted manufacturer of high-quality ignition transformers and power supply solutions for commercial and industrial combustion systems. With decades of engineering expertise, Allanson products are designed to deliver reliable ignition performance, operational safety, and long service life, making them a preferred choice for burners, boilers, and heating applications worldwide.

Parker is a trusted global provider of advanced motion and control solutions, delivering excellence in hydraulics, pneumatics, filtration, and precision engineering. Kentan Corporation proudly supplies Parker products in the Philippines, including solenoid valves, actuators, and other high-performance components, enabling industrial, mobile, and aerospace applications to achieve optimal efficiency, safety, and long-term reliability.

Klinger is a world-renowned provider of sealing, fluid control, and industrial gasketing solutions, delivering dependable performance and engineering excellence. Kentan Corporation proudly supplies Klinger products in the Philippines, including sight glasses, gaskets, and other high-quality components, supporting safe, efficient, and reliable operations across industrial and process applications.

McDonnell & Miller is a globally recognized leader in engineered boiler and liquid level control solutions, specializing in safety and precision for steam and hot water systems in industrial, commercial, and building applications. With a history dating back to 1924, McDonnell & Miller has built an enduring reputation for high-quality boiler controls, low-water cut-offs, flow switches, and liquid level devices that help protect equipment, enhance operational reliability, and ensure safe performance.

At Kentan Corporation, we proudly supply McDonnell & Miller products in the Philippines, offering a range of trusted components designed to meet demanding applications and strict performance standards.

SPAREPARTS & ACCESSORIES

Sensus is a globally trusted provider of advanced utility metering solutions, specializing in smart water, gas, heat, and energy measurement technologies. As part of the Xylem family of brands, Sensus combines decades of metering expertise with cutting-edge communications and data analytics technology to deliver reliable, accurate, and scalable metering systems for utilities and industrial applications worldwide.

At Kentan Corporation, we proudly supply select Sensus metering products in the Philippines, offering trusted solutions that help customers accurately measure consumption, optimize operational performance, and enhance infrastructure efficiency.

Suchy is a reputable manufacturer of industrial pressure measurement and control instruments, offering durable and precise solutions for a wide range of process applications. With a strong focus on quality and reliability, Suchy products are engineered to meet stringent industrial standards and deliver consistent performance in demanding environments.

At Kentan Corporation, we proudly supply Suchy products in the Philippines, including pressure gauges, pressure switches, pressure sensors, thermometers, and other essential measurement instruments to support safe, efficient, and accurate system operation.

Ashcroft is a globally respected leader in precision pressure and temperature measurement and control instrumentation, backed by over 170 years of innovation and engineering excellence. Trusted across demanding industrial and process applications, Ashcroft products are designed to protect people, equipment, and operations with reliable, accurate, and durable measurement solutions.

At Kentan Corporation, we proudly supply Ashcroft products in the Philippines, offering a comprehensive range of high-quality instruments that support accurate monitoring, system safety, and operational efficiency in industrial, commercial, and process systems.

Services

www.kentancorporation.com

Kentan Corporation provides comprehensive technical services that support the full lifecycle of industrial, mechanical, and control systems supplied by the company. Backed by experienced engineers and trained technicians, Kentan delivers reliable, efficient, and compliant services designed to ensure optimal system performance, safety, and long-term operational value.

Our service capabilities are tailored to support a wide range of Kentan-supplied products across industrial, commercial, and utility applications.

• Fabrication Services

Kentan Corporation offers professional fabrication services for piping, mechanical assemblies, skids, and system components. All fabrication work is performed to meet project specifications, industry standards, and application requirements, ensuring durability, accuracy, and reliability.

• Installation & Commissioning

We provide complete installation and commissioning services for Kentan products and systems. Our team ensures correct equipment integration, proper alignment, and safe start-up to achieve optimal performance from the outset.

• Troubleshooting & Technical Support

Our technical specialists deliver prompt troubleshooting and diagnostic services to identify and resolve system issues efficiently. This minimizes downtime and helps restore normal operations with minimal disruption.

• Preventive Maintenance Services (PMS)

Kentan Corporation offers structured preventive maintenance programs designed to extend equipment life, improve reliability, and reduce unexpected failures. PMS services include inspection, testing, calibration, and performance evaluation of installed systems.

• Repairs & Overhaul

We perform professional repair and overhaul services for a wide range of Kentan-supplied products, restoring equipment to reliable operating condition while maintaining safety and performance standards.

• Cleaning & System Servicing

Our cleaning services cover mechanical components, piping systems, and equipment assemblies, helping maintain efficiency, prevent contamination, and support safe, continuous operation.

Kentan Corporation services support all Kentan-supplied products, including but not limited to HVAC systems, compressors, valves, controls, instrumentation, and mechanical equipment across industrial and commercial facilities.
