About these services:

- NO COST – NO investment
- NO or very minimum TIME requirement
- NO or very minimum SKILL requirement
- Improve QUALITY of Care of your patients
- Innovative & Progressive
- Create NEW marketing opportunities
- Expand network
- Attract New Patients
- Increase Revenue

These services include, but are not limited to:

- Genetic testing & drug interaction testing
- Molecular testing (UTI, RPP, Covid, Wound)
- Urine Toxicology Screen
- Medical weight loss
- Regenerative Therapies (formerly known as Stem cell therapies and PRP)
- Shock-Wave Therapy
- DME (durable medical equipment)
- Medical grade CBD oils
- Med-Bed (Tesla healing technologies, PEMF, EMF shielding, oils)
- HBOT (Hyperbaric Oxygen Therapy), Ozon Therapy, Cryotherapy
- Biohacking 4 Life

Genetic Testing:

We have contracted with several laboratories to provide patients with the absolute best and cutting-edge genetic testing available today.

An easy mouth swab allows testing your patients' gene profile and identify predisposition of certain diseases. This information can be effectively used to implement preventative measures.

A pharmacogenetics test or drug interaction test provides important information on the effectiveness and safety of patient medications.

Our company provides a pharmacist, certified in genomics, to consult with your physician(s) and recommend a plan of action for the patient.

Our genetic laboratory tests are covered by Medicare and Medicare advantage, and some commercial plans also. These tests may help improve the star rating of your practice also.

Visit our website and review the benefits for your patients and practice, watch a short 4-minute video, and take a look at a sample report:

<https://genetictestingnow.com/physicians>

Molecular Testing: UTI, RPP and Covid, Wound

Advantages: Results within 24-hours, results identify the antibiotic to be prescribed, covered by insurance, no cost to healthcare professional.

Urine Toxicology Screen

A toxicology screen is a test that determines the approximate amount and type of legal or illegal drugs that a patient is taken. Toxicology screens may be used to screen for drug abuse, to monitor a substance abuse problem, to evaluate drug intoxication or overdose, or to make sure the patient is taking the prescribed medications.

Toxicology screening can be done quickly using a urine sample.

Medical Weight Loss – Be Lean

Popular diets and weight loss program are not healthy approaches to an optimal body composition and often provide only short-term results.

As a health care professional, you can help your patients with a healthy approach to weight loss. Our Be Lean program is safe, effective, and objective. The average patient loses 40lbs within 60 days and keeps off the excess weight. Patients show significant improved blood work after the Be Lean program,

including reduced A1C, reduced C-RP (inflammation) and better lipid and nutrient profiles. Our team coaches and assists your patients so you do NOT have to spend the extra time...

Be Lean program:

- Physician Supervised 60-day Program
- Objective measurements and laboratory testing
- Reduces systemic inflammation (C-RP)
- Healthy Nutrition Program
- Safe, all natural and plant-based
- Proprietary nutraceuticals (short-term only)
- No medicines and no HCG
- RESET Metabolism (not speed up metabolism)
- Flexible and custom
- No starving
- No calorie counting
- Average weight loss is 40lbs in 60 days
- Long-term results (easy to keep weight off)
- No need to be anti-social and avoid restaurants
- Personal coach 24/7
- Affordable

If you have any questions or concerns, please contact us anytime to schedule a conference call or in-person meeting.

Shock-Wave Therapy

This FDA registered modality effectively reduces pain and inflammation, promotes a sustained blood flow, and stimulates stem cell activity which allows injured tissues to heal and repair. Used by exclusive clinics such as Cleveland Clinic and many professional sports teams, this modality will help many of your patients with acute and chronic pain, soft tissue injuries, and neuropathies.

For more info, research, and testimonials:

For a FREE demo, contact us anytime.

DME (durable medical equipment)

Most clinics and doctors that prescribe DME, including back support braces, knee braces, wrist braces etc, refer the patient to a DME facility or pharmacy. Your clinic is missing out on a great source of income and in addition, your patients jump through hoops to get the equipment they need. We can license your clinic and make it Medicare compliant within 90 days. Your patients would be fitted at your clinic and walk out with their equipment., while you collect for all the equipment. Contact us for more details.

Medical grade CBD oils

Our organic, USA derived full spectrum hemp products and isolates provide a medical grade alternative to those sold in health food stores. The concentrations of CBD, CBG and/or CBN are much higher and therefore much more effective against pain and inflammation, anxiety, insomnia, etc. These oils and creams are a great alternative to medicines and opioids. Contact us for more info, products, and pricing.
