Stage 1

Pre-Event
Logistics &
Planning

Stage 2

Event Teardown
& Intake
Logistics

Stage 3

Post-Event
Fabrication &
Impact

1

Inventory Upload

List your upcoming event materials using our preloaded inventory template.

2

Upcycling Consultation & Quote

We send a custom proposal detailing potential upcycled outcomes for your items. Select some or all items to move forward.

3

Outcome Selection

Confirm your preferred path for each asset class: Keepsakes, Future Employee Workshops, or Youth Donation.

4

Timeline Integration

Your confirmed assets are automatically slotted into our upcycling queue based on your specific event dates.

5

On-Site Material Retrieval

We pick up the retired materials immediately at the end of your event (from the venue, your warehouse, or your office).

6

Intake Audit & Verification

Items are securely received at our warehouse, counted, and cross-referenced with your initial template.

7

Condition Assessment

Your asset template is updated with the final usable counts. Note: Damaged or unusable items will be returned to you or routed to specialized material recycling (additional fee applies).

8

Upcycling & Transformation Queue

Materials are upcycled for youth donations or for one of your upcoming workshops.

9

Final Asset Delivery

Path A: Delivered directly to our local youth community initiatives.

Path B: Delivered directly to your workshop.

10

Impact Reporting

Receive your customized Circular Impact Report to share with company and social media.
