

Designing a GOBO

Instructions: You are designing your own gobo.

- Design your gobo in the circle below. Do not include too much detail.
- Shade in where it would be cut out.
- Re-draw your design on a black circle (heavy paper works best).
- Cut out the part where you want the light to show through.
- Staple your final gobo (the black circle) to this worksheet.
- Through the power of flashlights, we will test your GOBO.
