## About Sharing Economy International

Sharing Economy International Inc. was established in 1987, it develops technologies, products and services with a view to minimize pollution and wastage to protect the environment. The company aims to foster the development of sharing economy through strategic acquisitions of businesses in the sharing economy arena as well as the research and development of blockchain to integrate the various businesses.

The company will utilize blockchain technology to integrate the various sharing platforms acquired and operated by third parties, to build a truly global sharing economy ecosystem in a distributed, efficient and secured operating environment. The company's vision is to create a reliable, user-friendly and secured sharing economy ecosystem. The autonomous applications will allow users to efficiently share both public and private resources. The goal is to apply advanced technological concepts from blockchain technology, such as distributed ledger and smart contracts, together with other technologies, such as image recognition and matching, mobile payment solutions, and artificial intelligence analytics to develop a 'Sharing Blocks' platform. 'Sharing Blocks' will allow sharing economy applications to share, communicate and collaborate with each other within the sharing economy ecosystem in a distributed, efficient and secured globally linked operating environment. This will make sharing simpler and easier and help sharing economy providers focus their efforts on their sharing business models with a ready-to-use technological solution.
