How to get your Reports and Images to us at Divine Breast Imaging

Why do we need these?

Our radiologist is VERY thorough and requires that we have REPORTS & DICOMS (original images) of any breast imaging you have had within the last THREE YEARS. **You do NOT have to have everything submitted before your appointment,** however… you must have everything submitted before we can add you to the "Ready to Read" list. Here is how you can be ready!

REPORTS:

Your reports can be downloaded directly into "Documents" in your Avara client portal. (NO SCREENSHOTS or PHOTOS, please! PDF format ONLY for reports.)

DICOMS (Images):

Six ways you can send Dicoms (images) to us…

- Contact the facility where you had your imaging done, or sign into their patient portal where they are kept. Download-then upload to our portal.
- Dicoms (images) can be downloaded onto Google Drive and then emailed to us at DivineBreastImaging@gmail.com
- You can send reports and images to us via intelerad.com (formerly known as Ambra.)
- You can send images to us via PowerShare (reports can be attached.)
- You could mail a CD containing your images (or have the facility mail the CD directly to us!) at Divine Breast Imaging 4336 4th St North, St Petersburg, FL 33703.
- If you don't have enough time to mail a CD, you can bring your CD of your images and your written reports with you to your appointment and we will process them then.

Call our office if you have any questions or need additional help. Thanks
