How to see your images in the Avara Viewer

There are four different image options for each breast: Speed of Sound, Reflection, Enhanced Reflection, and Attenuation. Those are listed on the left side of your screen.

In order to view the images in the large black part of the screen-

- Click on one of the choices on the left side (such as “Reflection”)
- Find the scroll bar on the right side of the large black window.
- Pull down on the scroll bar to scroll through images of the breast from the nipple to the chest wall. (This is the "Coronal" view mentioned below.)

And this is extra-
If you want, you can see other perspectives, such as the side view and the view from bottom of the breast to the top. Here is how you access that:

- Click on the down arrow at the very top right corner of your screen.
- Then towards the top center, click on “**Create MPR**.”
- **Choose a view**:

Axial- view from the bottom of your breast to the top

Coronal-view from nipple to chest wall (What a surgeon would see when operating.)

Sagittal- view across your breast from one side to the other
