

NATIONAL SECURITY, MONITORING & INVESTIGATIVE SERVICES

MOBILE SURVEILLANCE
PLATFORM (MSP's)

24 HOUR NATIONAL DISPATCH CENTER (NDC)

SPECIALIZED PROTECTIVE SERVICES has a 24-hour national dispatch center (NDC) for around-the-clock response for our clients and security staff needs; giving our security officers and clients the availability to reach a supervisor at any time. All of our security officers are equipped with the latest in technology of Cell phone/Two radios combination units available on the market. A quicker response provides a safer workplace for our employees, your staff and your property.

Our 24-hour national dispatch center provides our clients with the means to monitor their CCTV systems, Access Controlled Points, and many other specialized equipment (Remote Surveillances Systems), with our professionally trained security dispatchers.

Specialized Protective Services (SPS) maintains an inventory of **Mobile Surveillance Platforms (MSPs)**, which are self-sustained systems powered by solar and battery and utilize both WiFi and cellular communications to connect to our 24-hour National Dispatch Center (NDC). These platforms enable real-time monitoring and facilitate immediate emergency response by our professional patrol team or local law enforcement units.

Our MSP is a cutting-edge surveillance camera system mounted on a portable trailer, powered entirely by solar energy. This innovative platform offers a flexible and reliable security solution that can be easily deployed wherever you need it, without the constraints of traditional wired systems.

Ideal Applications for the MSP

- **Construction Sites:** Protect equipment and materials from theft and vandalism.
- **Special Events:** Ensure guest safety at festivals, concerts, and public gatherings.
- **Commercial Properties:** Monitor retail stores, warehouses, and office buildings.
- **Residential Communities:** Enhance neighborhood security and peace of mind.
- **Parking Facilities:** Deter vehicle theft and property damage.
- **Emergency Situations:** Deploy rapidly in response to natural disasters or unexpected incidents.

Mobile Surveillance Platform (MSP) by Specialized Protective Services (SPS)

At Specialized Protective Services (SPS), we understand the need for reliable and cost-effective security solutions for homes and businesses. That's why we offer an advanced Mobile Surveillance Platform (MSP), a cutting-edge self-sustaining solar-powered surveillance system designed to provide round-the-clock protection for any property. Whether you're safeguarding a construction site, residential community, business premises, or an event, our MSP ensures that your property remains secure, day and night.

The Benefits of a Mobile Surveillance Platform (MSP)

1. **Self-Sustaining Power Source** The MSP is equipped with high-performance solar panels and battery systems, ensuring that the platform operates continuously without relying on traditional power sources. This self-sustaining capability means that even in remote locations or during power outages, your security remains uncompromised. The solar panels keep the system charged, while the battery ensures 24/7 surveillance, day and night.
2. **Portable and Flexible** One of the key advantages of our MSP is its portability. Mounted on a robust and portable trailer, the MSP can be easily deployed to any location. Whether you need temporary security for an event, protection at a construction site, or a long-term surveillance solution at your business or home, the MSP can be relocated as needed. Its flexibility allows it to cover a wide range of security requirements without the need for complex installation processes.
3. **High-Definition Surveillance Cameras** Our MSP is equipped with state-of-the-art high-definition (HD) surveillance cameras that provide crystal-clear video footage of your property. With features such as zoom, tilt, and pan functionality, the cameras can cover a wide area, ensuring there are no blind spots. The cameras also have night vision capabilities, enabling 24-hour monitoring in both well-lit and low-light conditions. This advanced camera technology helps deter criminal activity and provides crucial evidence in case of any incidents.
4. **24/7 Remote Monitoring** When you choose SPS's MSP, you get more than just surveillance equipment—you gain access to our professional monitoring services. Our National Dispatch Center (NDC) monitors the cameras 24/7, ensuring that any suspicious activity is detected and addressed in real time. Should our team identify a potential threat, they can initiate an emergency response, contacting local law enforcement or dispatching a professional security patrol team to the site. This proactive approach ensures that threats are neutralized before they escalate.
5. **Immediate Emergency Response** In the event of an emergency, our MSP is designed to provide immediate alerts and responses. Once a potential security breach is detected, our team takes swift action to ensure that the situation is under control. Depending on the severity of the incident, SPS can dispatch our professional patrol officers to the site or contact local law enforcement for assistance. This rapid response ensures that your property is protected, and any threats are addressed promptly.
6. **Scalable Security Solution** Our MSP is a scalable solution, meaning it can be customized to meet the unique security needs of your property. Whether you need a single unit or multiple platforms to cover larger areas, we can tailor the MSP to suit your requirements. It's perfect for large construction sites, outdoor events, retail centers, warehouses, and residential communities. You can deploy multiple MSP units across different locations and monitor them centrally, ensuring comprehensive security coverage.

The Benefits of a Mobile Surveillance Platform (MSP)

7. **Cost-Effective Security** Unlike traditional security systems that require extensive infrastructure and maintenance costs, the MSP provides a cost-effective solution that saves you money in the long run. The self-sustaining nature of the system eliminates the need for costly electrical installations or fuel-powered generators. Moreover, with the remote monitoring and surveillance capabilities, you can reduce the need for on-site security personnel, further cutting operational expenses while maintaining a high level of security.
8. **Environmentally Friendly** The MSP's solar-powered design makes it an environmentally friendly option for security-conscious businesses and homeowners. By harnessing the power of the sun, the system reduces carbon emissions and lowers your overall environmental footprint. It's a sustainable solution that allows you to protect your property while contributing to a cleaner, greener planet.
9. **Customizable Features** We understand that different properties have different security needs. That's why our MSP comes with customizable features. In addition to surveillance cameras, you can opt for extra functionalities such as motion detection, infrared sensors, license plate recognition, and two-way audio systems. These additional features enhance the platform's ability to detect, deter, and respond to potential security threats.
10. **User-Friendly Interface** Monitoring and controlling the MSP is simple and user-friendly. Our cloud-based platform allows you to access live video feeds, review recordings, and manage alerts through any device, such as your smartphone, tablet, or computer. You can monitor your property from anywhere in the world, ensuring peace of mind no matter where you are.

What is the Mobile Surveillance Platform (MSP)?

The MSP is a cutting-edge surveillance camera system mounted on a portable trailer, powered entirely by solar energy. This innovative platform offers a flexible and reliable security solution that can be easily deployed wherever you need it, without the constraints of traditional wired systems.

Why Choose Specialized Protective Services?

At SPS, we combine advanced technology with professional expertise to deliver comprehensive security solutions.

- **Experienced Team:** Our security professionals are trained to handle a wide range of situations with efficiency and discretion.
- **Customized Solutions:** We tailor our services to meet the unique needs of your property.
- **Reliable Support:** Enjoy peace of mind with our dedicated customer service and technical support.

Key Advantages of the MSP

1. Self-Sustaining Solar Power

- **Eco-Friendly Energy:** Harnesses solar power, reducing environmental impact and eliminating the need for external power sources.
- **Uninterrupted Operation:** Equipped with battery storage to ensure continuous surveillance, even during nighttime or cloudy conditions.

2. Portability and Flexibility

- **Easy Deployment:** Quickly set up the MSP at construction sites, events, parking lots, residential areas, or any location requiring enhanced security.
- **Adaptable Positioning:** Relocate as needed to cover different areas or respond to changing security requirements.

3. Advanced Surveillance Technology

- **High-Definition Cameras:** Capture clear, detailed footage with our top-of-the-line cameras, day or night.
- **360-Degree Monitoring:** Pan-tilt-zoom capabilities allow comprehensive coverage, minimizing blind spots.
- **Night Vision and Thermal Imaging:** Maintain visibility in low-light conditions for around-the-clock protection.

4. 24/7 Monitoring Services

- **Professional Oversight:** Our dedicated team monitors your MSP in real-time, ready to respond to any incidents.
- **Remote Access:** Access live feeds from your smartphone or computer, keeping you connected no matter where you are.

5. Immediate Emergency Response

- **Security Patrol Dispatch:** Our professional security patrols are on standby to respond swiftly to any alerts.
- **Law Enforcement Coordination:** Collaborate with local authorities to ensure a prompt and effective response when necessary.

6. Cost-Effective Solution

- **No Infrastructure Costs:** Avoid the expenses of installing permanent surveillance systems.
- **Flexible Plans:** Choose rental or purchase options that best fit your budget and needs.

7. Enhanced Deterrence

- **Visible Presence:** The prominent MSP trailer acts as a strong deterrent against potential criminal activity.
- **Customizable Alerts:** Set specific triggers and notifications to stay informed about unusual activity.

Let Specialized Protective Services provide the security your home or business deserves with our innovative Mobile Surveillance Platform. Trust in our commitment to keep you safe, anytime and anywhere.
