

May's Portfolio

By May Smith James

original Idea.

the sufferings for love

this was an original idea by me to depict the long distance relationship . the eye with spirals represent a blind eye .. which shows how much a lover craves to see their other half .. the sun on the red lover's side represents day and the green portion represents night . this shows the time differences . the two human figures represent two opposites . one warm and one cold . this can also depict their behaviour
