

Capability Statement

Restoration Horticulture brings 20+ years of expertise in biodiversity restoration, nursery production, and ecological project delivery.

Contract Seed Collection

Targeted seed collection to meet project requirements

Nursery Operations

GHC Nursery partnership— delivering large-scale native plant production and pre-grow contracts for ecological restoration projects

Restoration Consultancy

Strategic plant species selection to deliver lasting ecological value

Who We Work With

Wholesale nurseries

Landscape and Ecological contractors

Government environmental agencies

Urban and industrial land planners

Seed Resource Management

Targeted seed collection, processing, and storage strategies

Proven dormancy-breaking techniques and scalable seed production systems

Project Highlights

Menangle Park Seed Collection Program (2025)

Native seed harvesting across priority Nepean River restoration sites

Phenology-based scheduling to maximise genetic diversity and viability

Appin Road Koala Fence Project (2025)

Provenance-specific seed recovery to restore koala habitat

Collaboration with Mt Annan Botanic Gardens

Ian brings over 30 years of experience in nursery operations, native seed restoration, and large-scale production. With diploma Horticultural Business Management, he combines practical expertise with ecological insight, focusing on the conservation of Sydney's native flora.
