

Please take the time to think things through

Risk vs Reward

Build Great Systems Develop Good People

Some common causes of unsafe conditions or acts:

- Production only driven culture
- Poor communication
- Inadequate resources or the lack of planning
- Poor housekeeping
- Improper material storage
- Defective or wrong tool for the task
- Poor maintenance
- Lack of proper machine guarding
- Improper usage or lack of PPE
- Poor Body positioning or mechanics
- Weather / Environment
- Lack of, or not following proper procedure
- Poor understanding of or neglect towards the inherent risk

Once an unsafe condition or act is discovered:

- If possible, correct the condition yourself – Be sure it is safe to do so!
- If not, while at work -Immediately report the unsafe condition or act to your supervisor
- Always follow - up: Document – Investigate thoroughly to help prevent similar future incidents from occurring
