

SUMMER PRACTICE

First and foremost, we want to take this as an opportunity to thank you for all the work that you have done with your child this school year. We have seen each child grow academically and socially. Below are some activities/ideas to help your child continue to grow in math and reading over the summer. Feel free to use them as you wish! We wish everyone a wonderful summer break.

Math

Use numbers in real life as much as possible. Students would be amazed to see how much we need numbers and math in their everyday life.

- Make a new recipe- double or cut the recipe in half to use multiplication and division
- Grocery shop- talk about how many items are in a dozen, count out a certain number of fruits, figure out how many servings of food are in a container
- Go to a store- use percents to find the sale price of an item, count back change

Khan Academy

Use this website for grades K-12 math practice. Sign us as a parent for continued use.

www.khanacademy.org

iPractice

This website is geared for students 4th grade-12th grade.

Reading

Acorn Library- library card and rental services

15624 Central Avenue

Oak Forest, IL 60452

708-687-3700

- Watch a television show together and make predictions: "What will happen next week?" "Why would someone do what s/he did?"
- Watch a movie and summarize plot points: "Who were the characters?" "What was the problem in the movie?" "How was it solved?"
- Read a map before taking a trip somewhere

Epic

Parents do need a subscription for this website, but thousands of digital books are available. Audiobooks and videos are available as well!
