

SNJ101

Plasmin-Independent Thrombolytics

Hyeon J Kim, Ph.D.
Founder/CEO
SNJ Pharma Inc

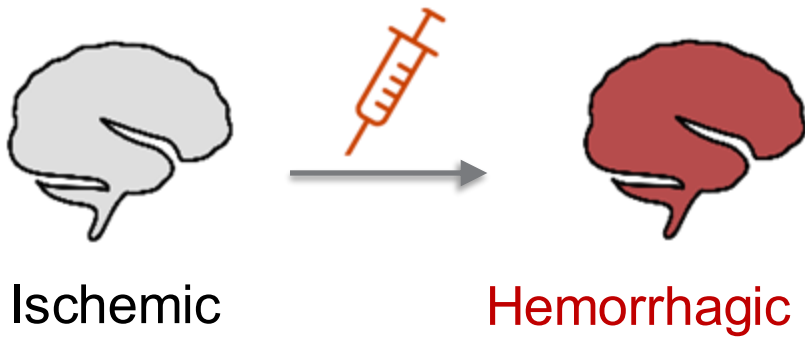

THROMBOSIS & THROMBOLYTICS

250 M

1 Drug

10X Bleeding

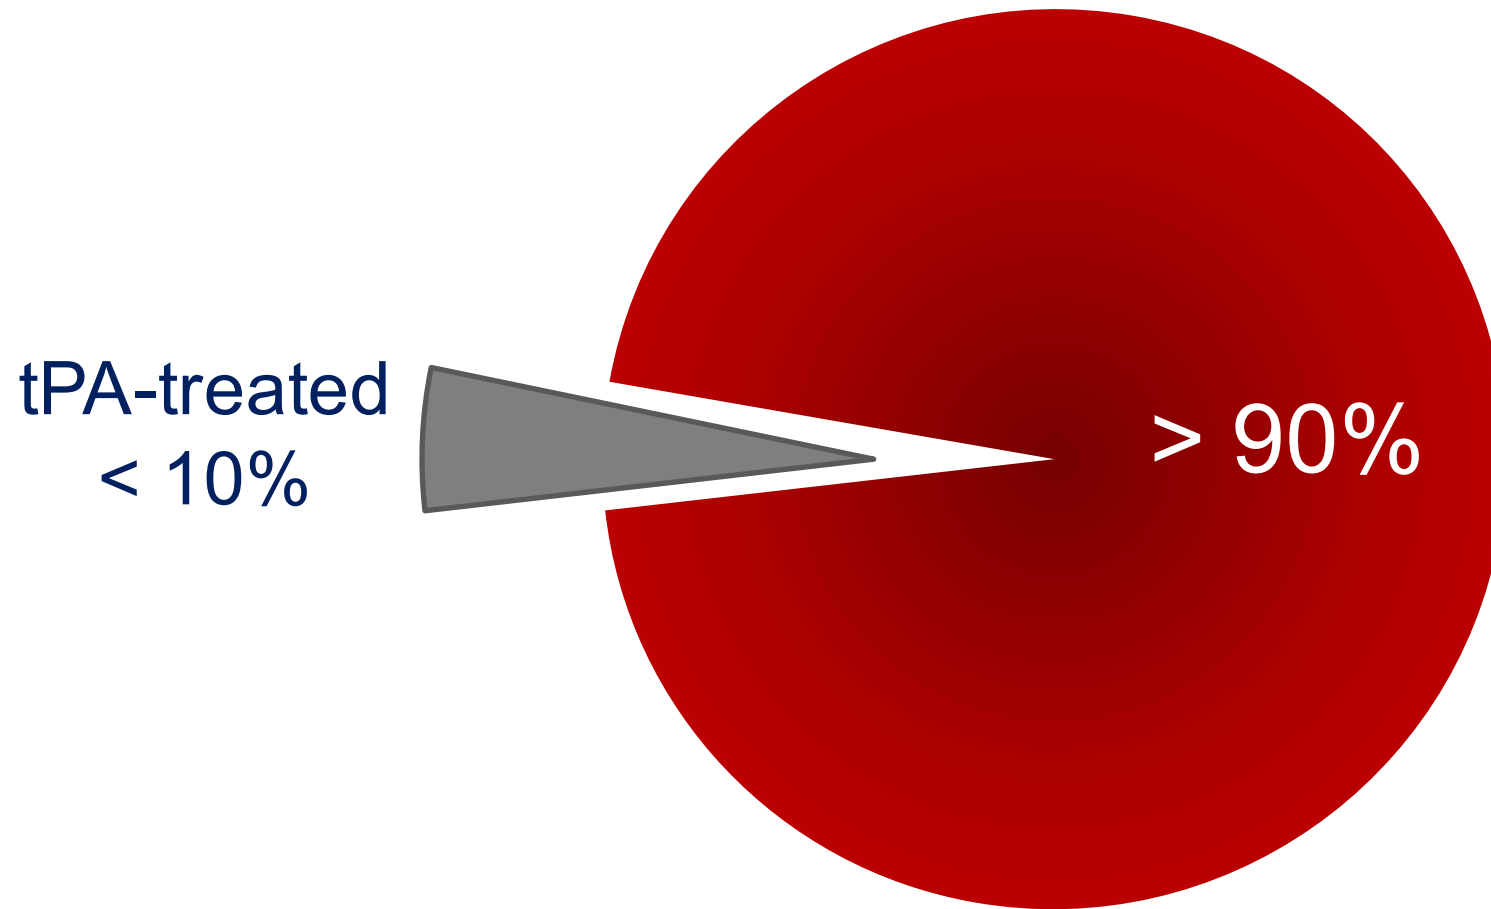

Exclusion Criteria

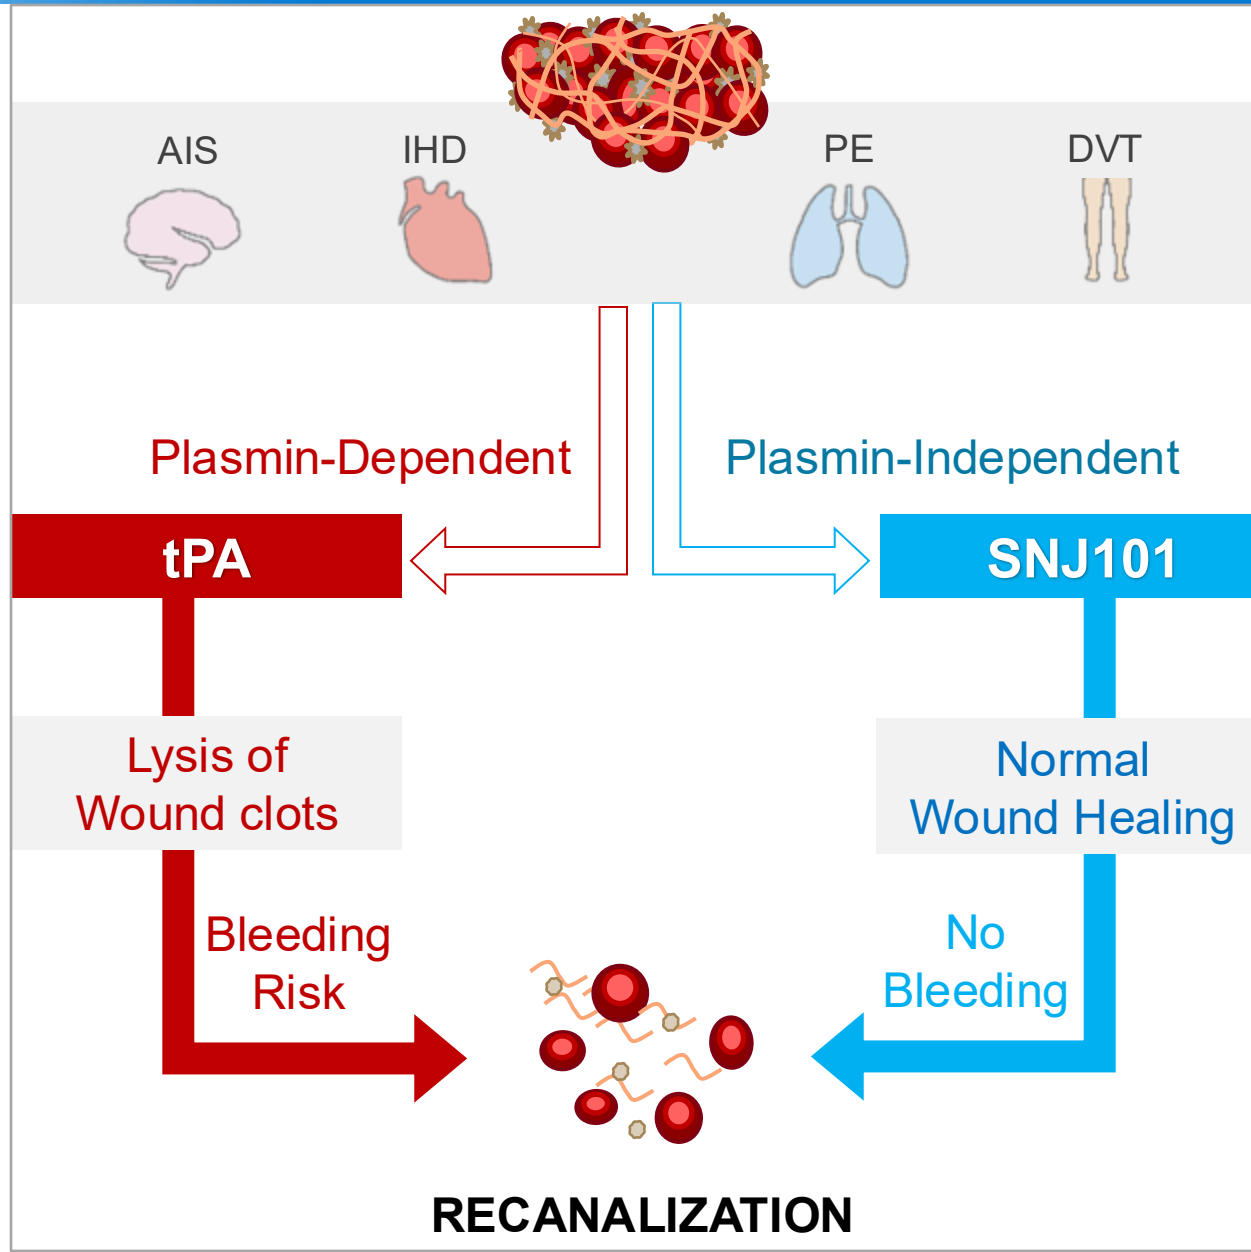

Inclusion Criteria

UNMET NEEDS

SNJ101 (recombinant HtrA1): Safer than tPA

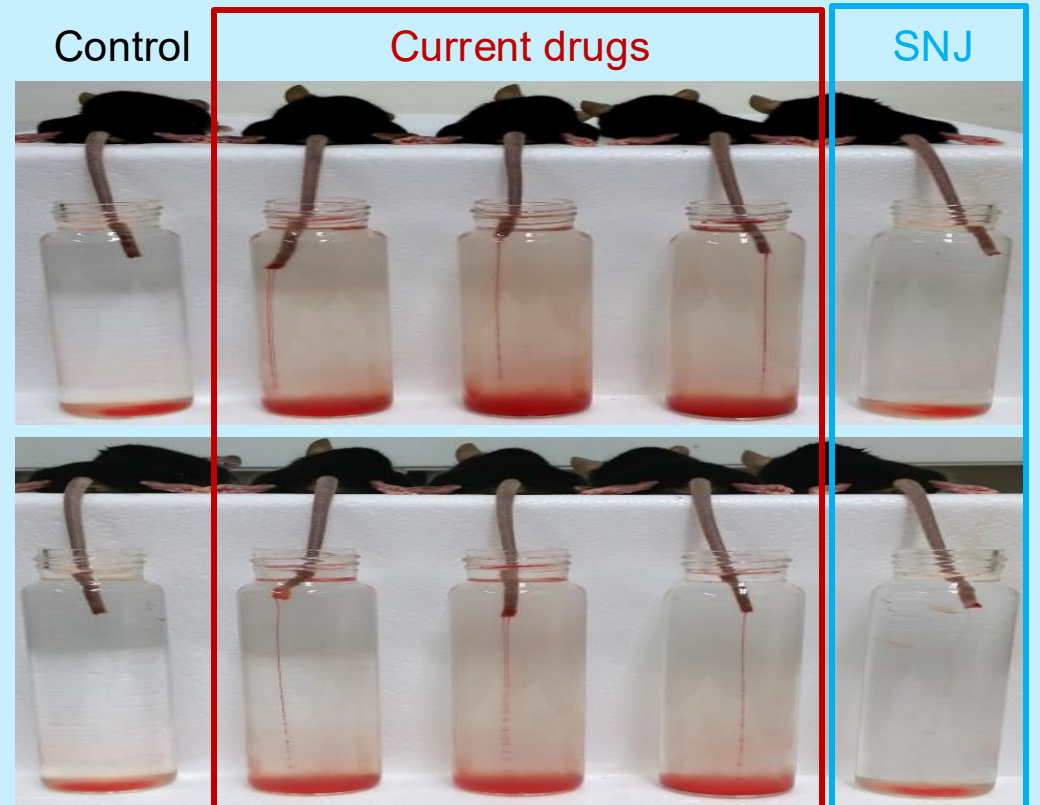

SNJ101: Normal wound healing without bleeding

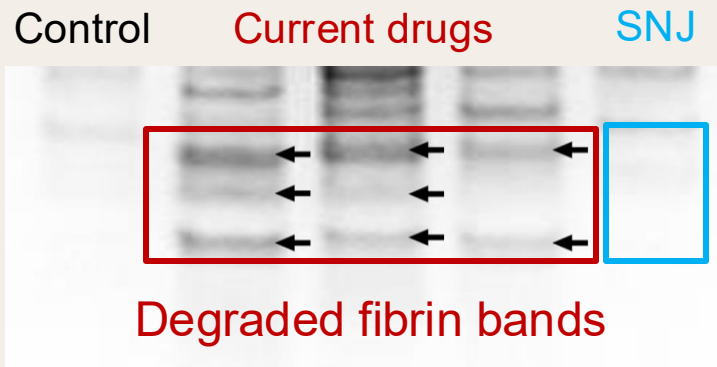

(1) No bleeding from the excised wounds

(3) No excessive bleeding from wounds in a mouse tail bleeding assay

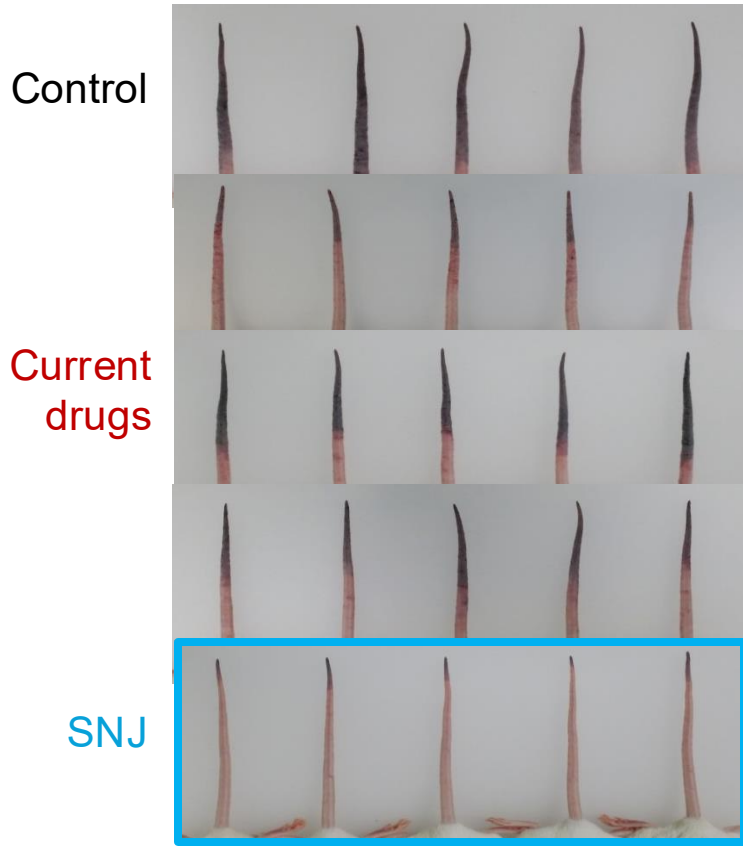

(2) No lysis of fibrin in wound clots

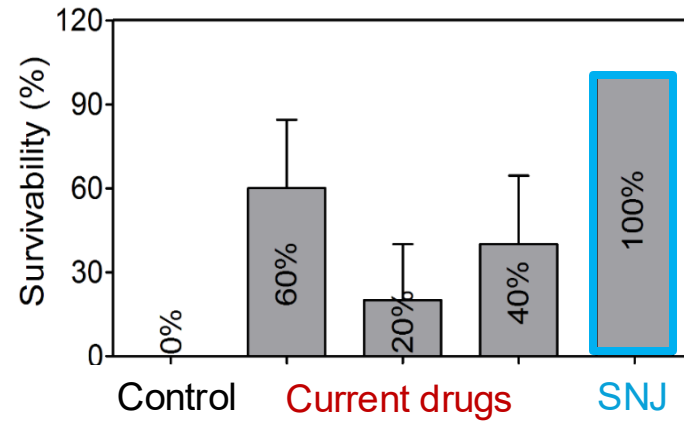

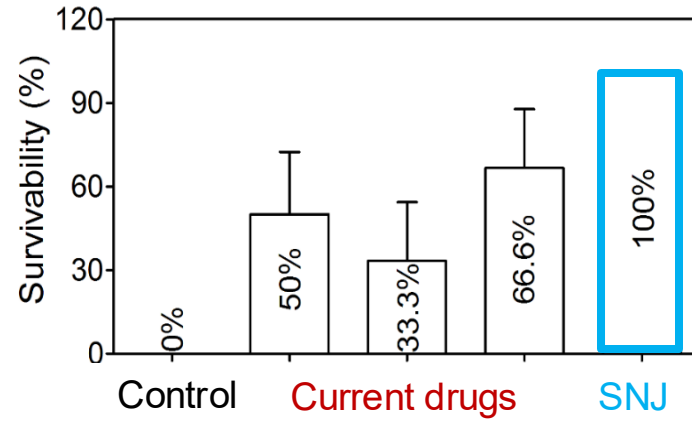

SNJ101: Superior efficacy compared to tPA

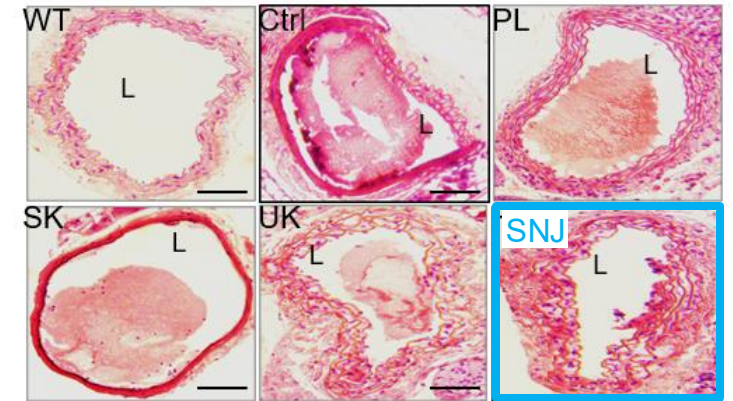

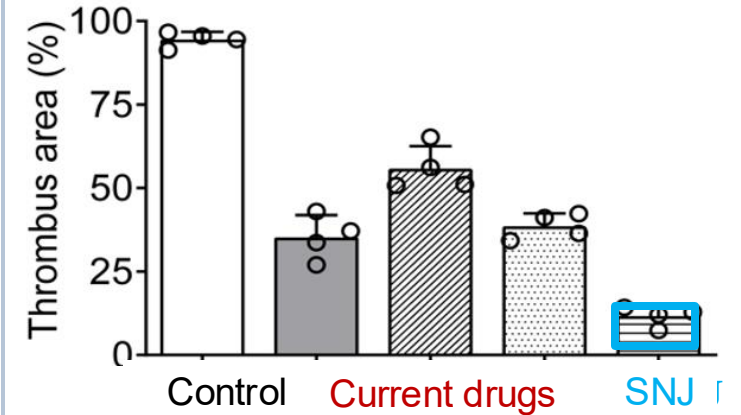

Thrombosis

Pulmonary Embolism

Large Vessel Occlusion

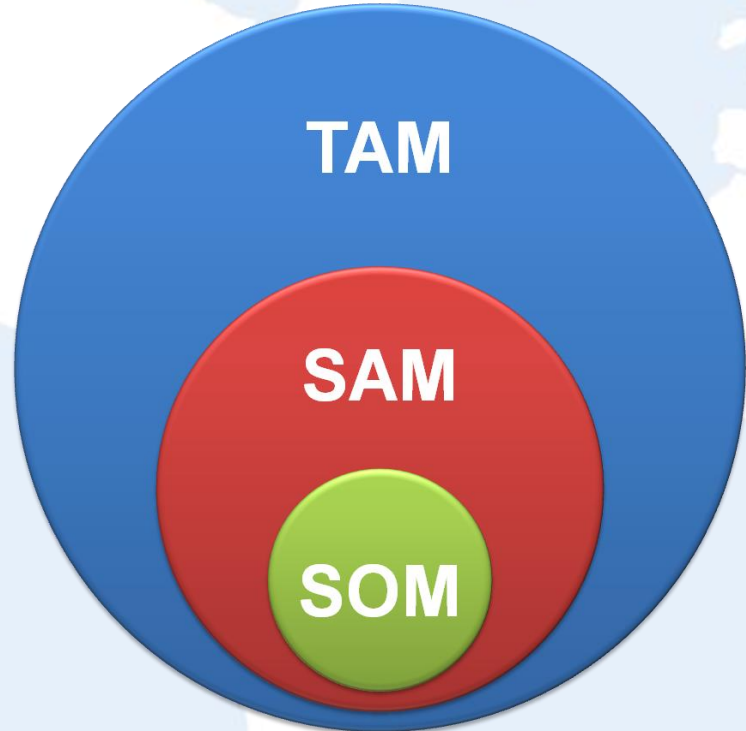

COMPETITIVE LANDSCAPE

Intervention	Drug/Procedure	Thrombi Removal	No Plasmin	Normal Clotting	Normal Bleeding	No Windows	Disadvantages or Advantages
Plasminogen Activator	tPA (Alteplase, Tenecteplase)						Bleeding risks
Anti-coagulant	Warfarin, Heparin, Eliquis		n.a.			n.a.	Indirect prevention Bleeding risks
Anti-platelet	Aspirin, Clopidogrel		n.a.			n.a.	Indirect prevention Bleeding risks
Mechanical Device	Endovascular Thrombectomy		n.a.	n.a.	n.a.		Limited to LVO Limited access
Thrombase	rHtrA1 (SNJ101)						No plasmin No hemorrhage Normal wound healing

n.a.: not applicable

THE MARKET OPPORTUNITY

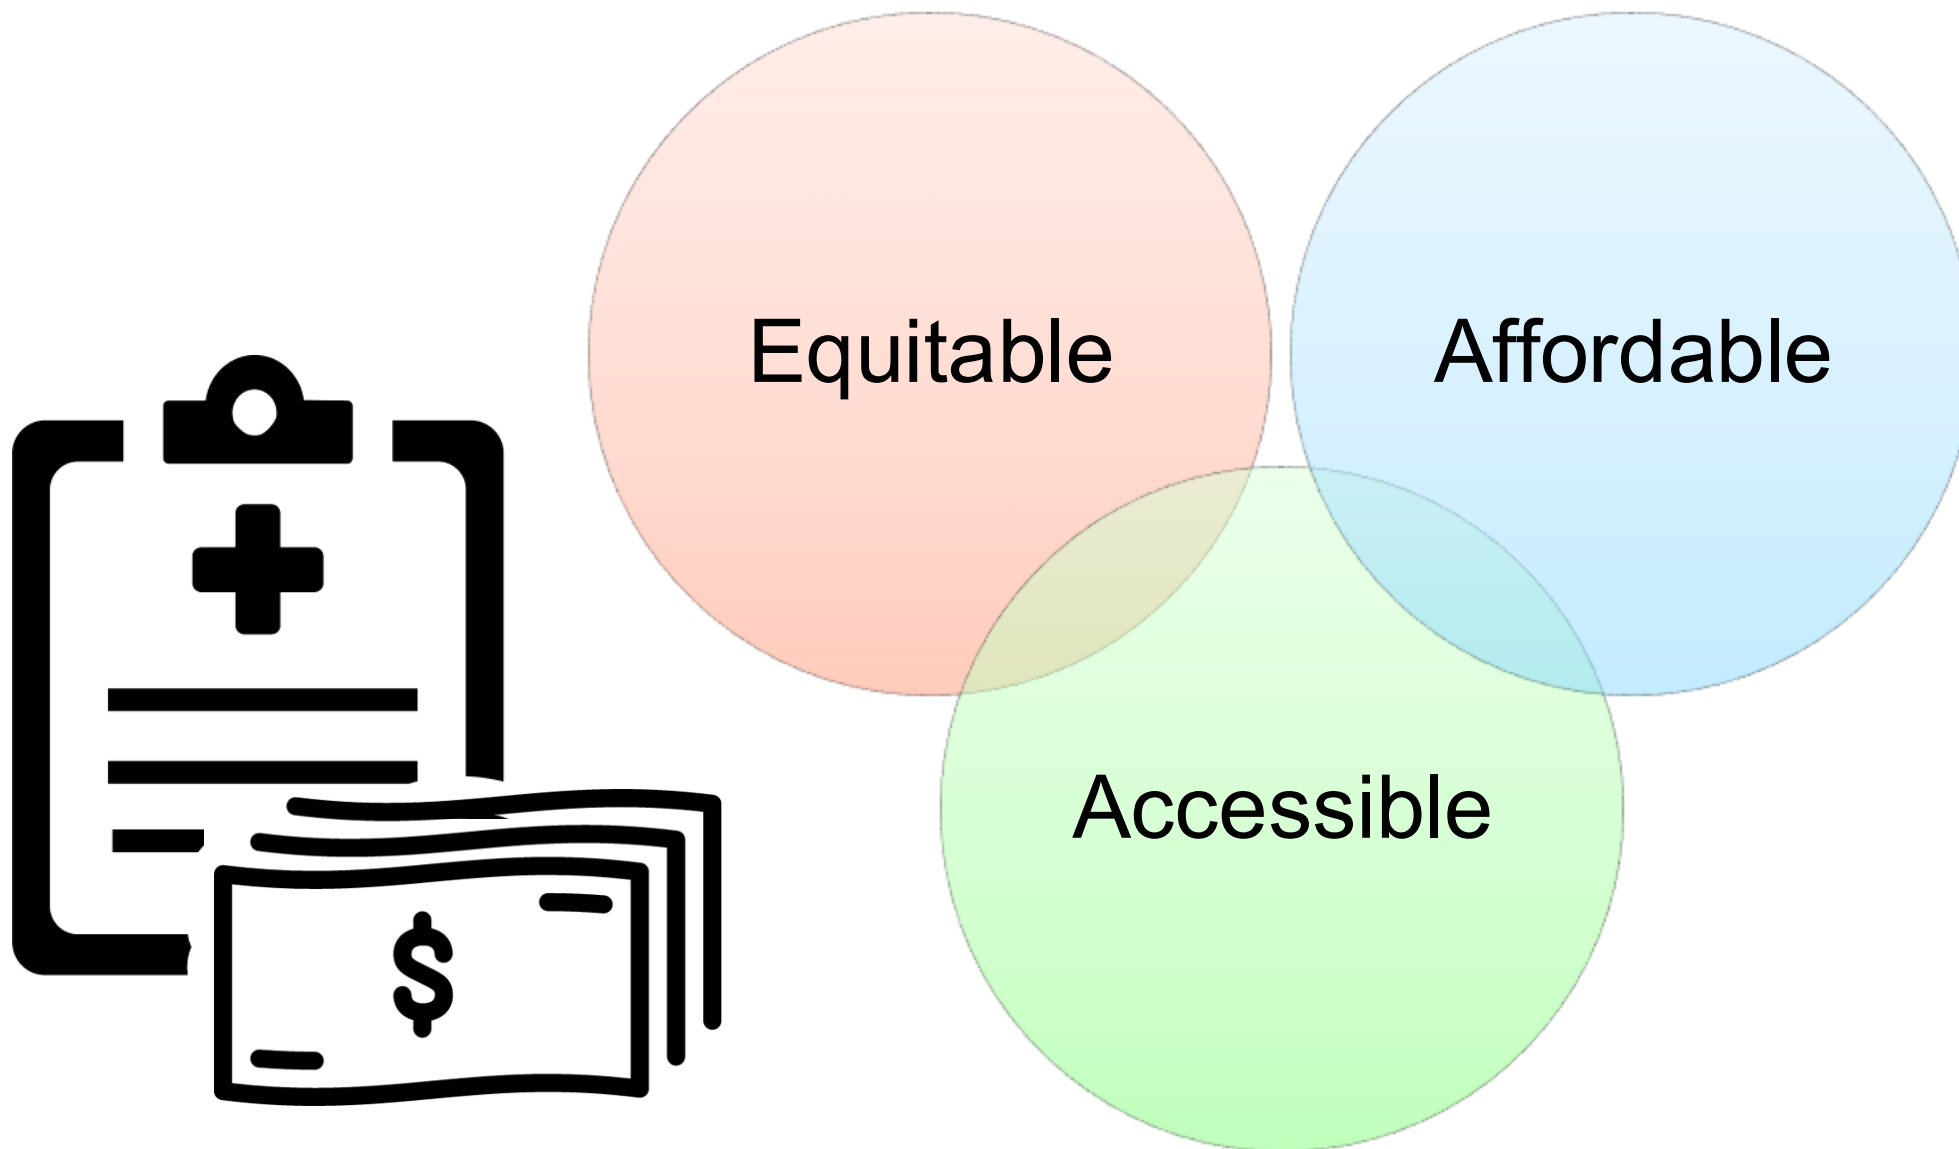

- ❑ **Total Addressable Market**
= (10% of patients X \$10K) = \$250B
- ❑ **Serviceable Available Market**
= (33% of TAM) = \$83B
- ❑ **Serviceable Obtainable Market**
= (30% of SAM) = \$25B

INTELLECTUAL PROPERTY

- ✓ Thrombolytic agents for Intravascular clots
- ✓ 2 Granted patents
- ✓ 1 PCT & 9 Pending patents (US, CA, EU, JP, etc.)

HEALTH ECONOMICS & REIMBURSEMENT

- ✓ Thrombase safer than tPA
- ✓ Strong support data and strong IP
- ✓ Asking for strategic partners and investors
