

CONCEPT OF LEVERAGE AND THE RIGHT OF EMPOWERMENT

①

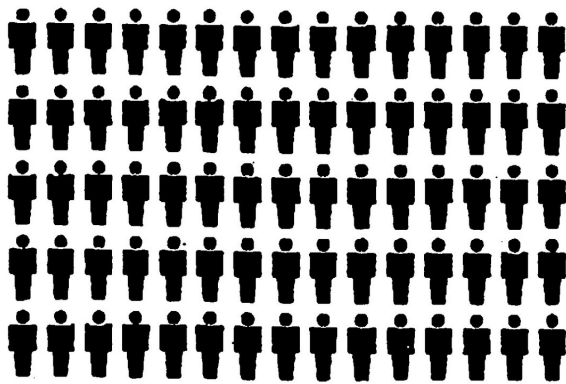

The successful premise behind network distribution (NWD) is based on leverage and duplication.

②

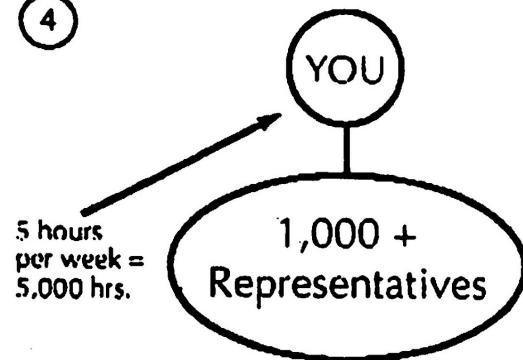

Although one's network never grows exactly as illustrated...

③

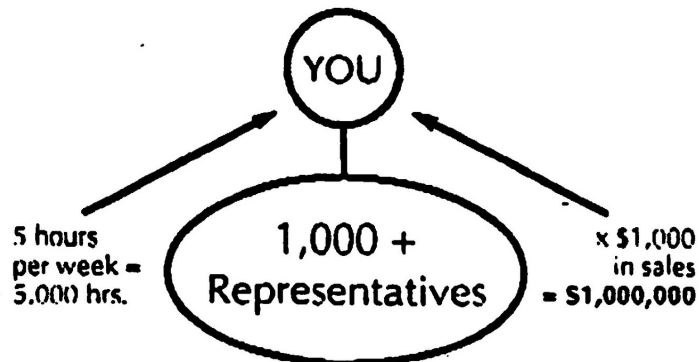

...if you and the representatives in your organization each sponsor just one person a month, you'd have over 4,000 people in your business after one year.

④

Imagine, if only 25% of your representatives worked only 5 hours a week, you'd benefit from over 5,000 hours EVERY WEEK!

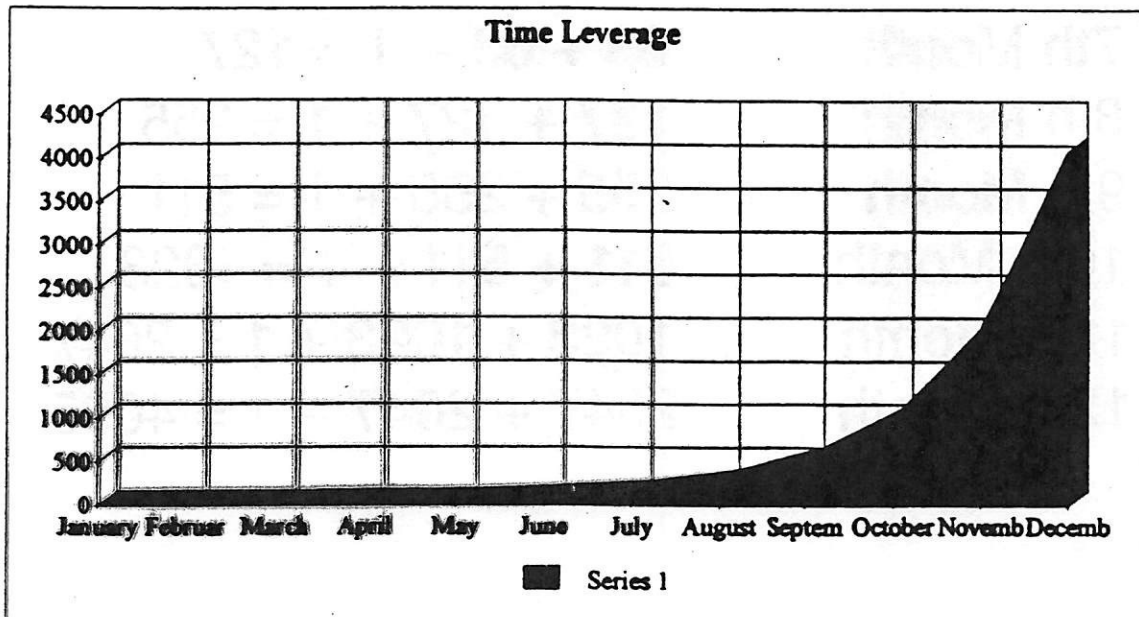

⑤

Imagine again, if your 1,000 representatives made a purchase or sale of only \$1,000 – your business would have sold ONE MILLION dollars in product because YOU started the network.
