

THE BEST WAY TO EAT CURRY FRIED CHICKEN

We obviously want you to have a **#currylicious** experience, so here are some tips on how best to heat up your chicken and their sidekicks once they arrive at your doorstep or when you're ready for your **#curryparty!**

OVEN

For chicken, fries and sandwich,
3 to 5 mins at 180 degrees celcius

AIR FRYER

For chicken, fries and sandwich,
5 mins at 150 degrees celcius

MICROWAVE

For chicken, 1 min on medium high
For sandwich, 20 secs on medium high
**Please try not to microwave your fries - oven or air fryer works best - but if you must, 30 secs max*

Thank you so very much for your order!

We hope you enjoy your newfound favourite
#extracurricularactivities!

We'd sure love to **#curryfavour** with you. If you have any feedback or hashtags ideas, feel free to slide into our DMs at **@curryfried.sg**

Also, good things must share right? Tag us **@curryfried.sg** and spread the love with your **#currybuddies**
