

Toy Bob

General

Cats of small size in the colour seal point. Short body with strong bone structure, broad chest and short neck. Well-muscled. Back is almost straight. Legs are rather strong. Shortened tail. Cats still in development till 1.5 years.

Body

Square, smaller than medium size, compact, short, solid, muscular. Broad rib cage. Short and powerful neck. The back is almost straight. Strong, medium in length legs, hind legs slightly longer than forelegs. Paws are oval, with elongated fingers on hind legs. Sexual dimorphism is not very pronounced. Preferred weight for adult cats is less than 2 kg.

Tail

Flexible, preferably is composed of several kinks and curves in any combination, but may be also straight. Visible length is not less than 3 cm and not longer than 1/3 of the body length.

Head

Short trapezium shape with gently rounded contours. Full, not flat forehead. Distinctly curved profile with a dip from the forehead to the nose at the eye-middle level. Definite stop is not allowed. Nose is medium in length. Bridge of the nose is slightly curved. Medium, rounded, clearly defined cheekbones. Muzzle is short, rounded, without pinch.

Ears

Medium sized, with rounded tips. Medium high set and slightly tilted forward. The distance between the ears is no more than one ear width.

Eyes

Large, wide open, round, very expressive. Almost straight and set wide apart. The colour is an intense deep blue.

Coat

The coat is short, dense, resilient, not close lying and with developed undercoat. The topcoat is almost the same length as the undercoat. Kitten can have a little bit wooly coat. Evenness of the body colour and contrast with the points are more important than whiteness.

Colour

seal point

Faults

Head:

- wedge-shaped or narrow head
- flat forehead
- pointed or elongated muzzle
- too slight dip in profile

- weak chin

Eyes:

- Almond shaped eyes

Ears:
