

## Project: Atella - Garden Suites

Scope of Work: Engineering and design for Garden Suites

Client: Atella

Location: Various cities in the GTA

### Project Statistics

We have partnered with numerous companies across the GTA to develop custom products tailored to their unique needs. One notable collaboration is with Atella, where we contributed to the design, engineering, and execution of multiple garden suite projects throughout the region.

We designed the interior layout to maximize space and while making sure there was ample space for activities inside the garden suite.

Our scope of services during this project included: Preparing architectural floor plans, elevations and zoning/building permit package.

### Project Team:

Project Lead – Sabih  
Drafting Manager – Usman  
Project Coordinator – Aiman
