

Rear Wall goes in the last slot for each of the Vertical stabilizers.

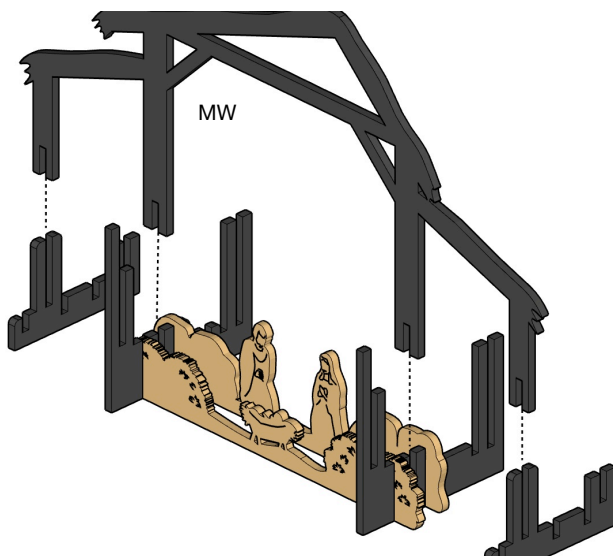

Dashed lines indicate position of insertion.

Step 1 - Insertion of Rear Wall

For visual clarity, previous step inclusions for each follow-on step are not necessarily re-drawn.

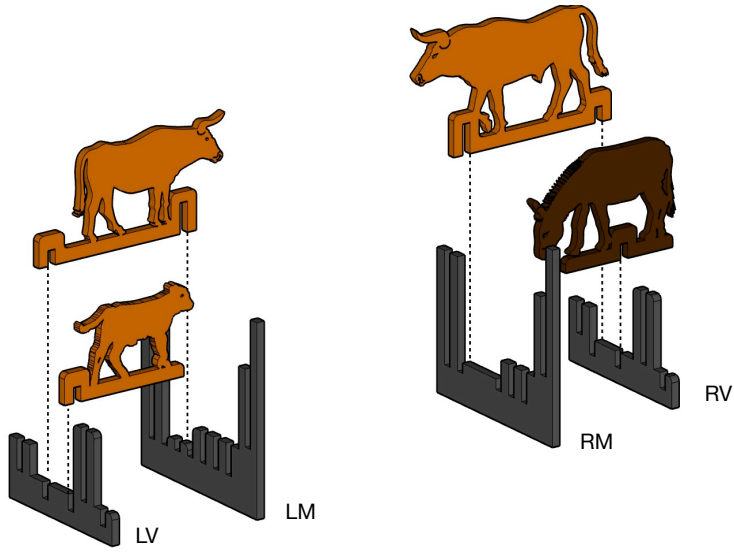

Step 2 - Insertion of Figurines

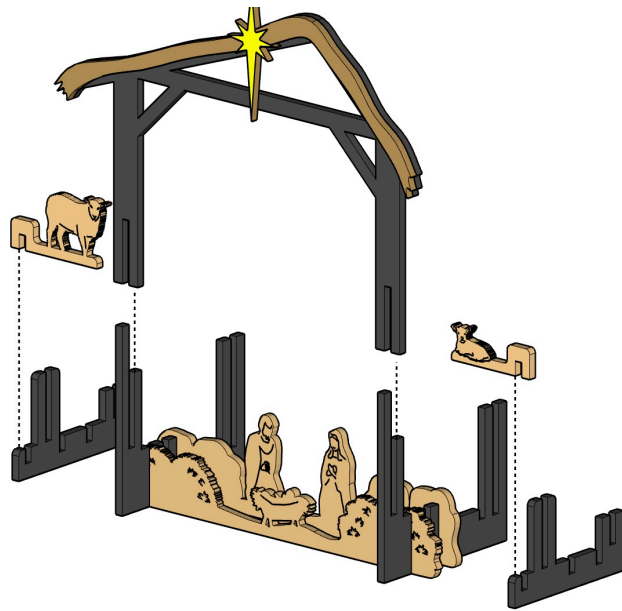

Step 3 - Insert Middle Wall

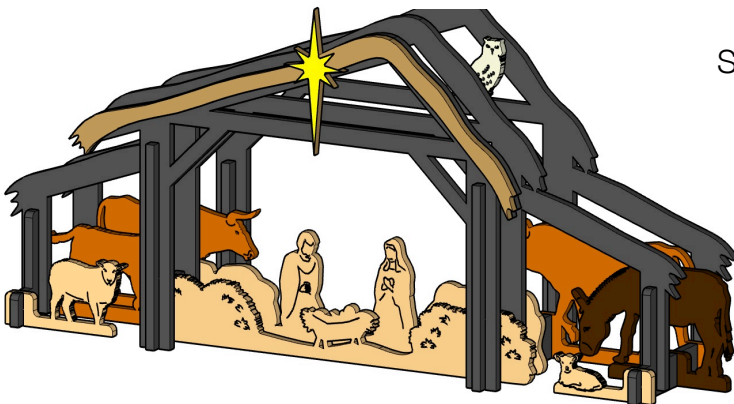

Middle Wall goes between Figurine layers.

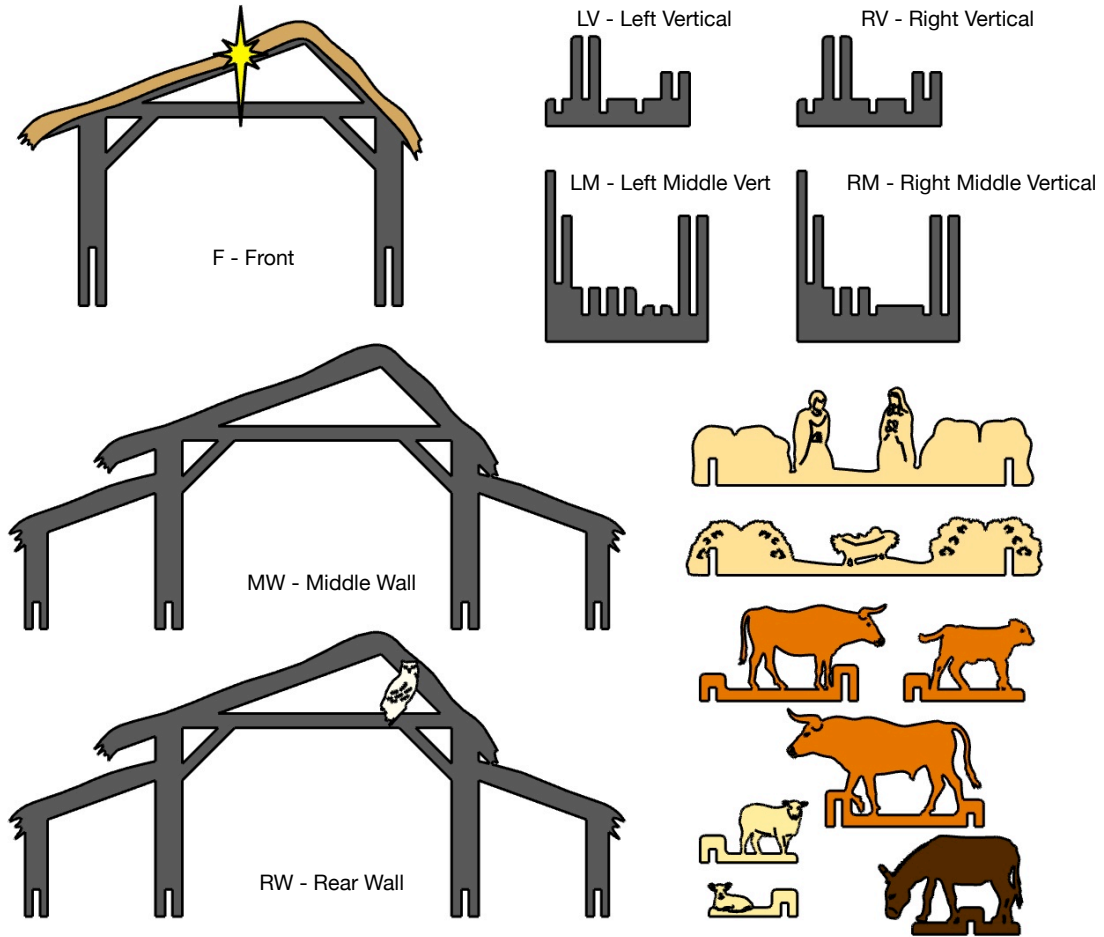

Step 4 - Add Large Animals

Step 5 - Add Front Wall and Sheep

Completed Assembly. Enjoy!

Depiction and Identification of parts

Take note of the subtle but important differences in the Verticals.

The placement of the slots is key. For example, when the calf is placed in the Left Vertical, the calf will align and appear to be eating hay associated with the Mary and Joseph Figurine.
