

LACKAWANNA RIVER

2020 Pennsylvania River of the Year

The Lackawanna River

- The river is a 62-mile-long tributary of the Susquehanna River.
- About 38.4 miles of the river are navigable by canoe/kayak during snowmelt and within three to seven days of hard rain.

- Five sections of the river are designated by the Pennsylvania Fish and Boat Commission as Class A Wild Trout Waters for brown trout. That designation is remarkable for a river that was once heavily polluted.
- The name comes from a Leni Lenape word meaning "stream that forks."

- The most common duck species are black ducks, mallard ducks, and wood ducks. Other birds in the watershed include belted kingfishers, great blue herons, and green backed herons.
- Visit LRCA.org for special and current programs and events throughout the year.

Commonwealth of Pennsylvania, Tom Wolf Governor
 Cindy Adams Dunn, Secretary of Pennsylvania Department of Conservation and Natural Resources
 Bureau of Recreation and Conservation, Rivers Programs

This project was financed in part by a grant from the Community Conservation Partnerships Program, using Environmental Stewardship Funds, under the administration of the Pennsylvania Department of Conservation and Natural Resources, Bureau of Recreation and Conservation.
