

The Lackawanna River is 40.8 miles long. Its name comes from the Lenni Lenape word "Lechauwa-hannek", meaning "the river that forks". Through the hard work of conservationists, many plants and animals are able to live in and along the river. Can you find among the Oak, Paper Birch, Mountain Laurel and Huckleberry plants the Black Bear, Grey Squirrels, Red Fox, Muskrat, Skunk, Wood ducks, Opossum, Cooper's Hawk, Great Blue Heron, White Tailed Deer, Green Frog, Snapping Turtle, Osprey, Crayfish, Beaver, Spotted Salamander, Barred Owl, Timber Rattlesnake, and Brown Trout. Color them in as you find them! Have fun, Friends of the River!
