

Company Summary

☒ Innovative Marine Engineering Solutions - Atlantis Seawall Marine can provide value-driven solutions for your marine engineering project.

☒ Expert Coastal Engineering Services - From seawalls to marinas, our team of professionals can design and manage your coastal engineering project from start to finish.

☒ Global Presence, Local Expertise - With offices in Florida, New York, and Dubai, we bring our extensive experience and knowledge to projects around the world.

☒ Sustainable and Resilient Solutions - We prioritize sustainable and resilient solutions for our clients to ensure their projects withstand the test of time and changing conditions.

☒ Comprehensive Project Management - Our project management services can ensure your marine engineering project runs smoothly, from planning to execution and beyond.

☒ Collaborative Approach - We work closely with our clients to ensure their needs and goals are met while maintaining the highest standards of safety and efficiency.

☒ Cutting-Edge Technology - Our team utilizes the latest software and modeling techniques to provide accurate and efficient designs for marine structures.

About Us

Atlantis Seawall is a leading engineering firm specializing in coastal engineering, providing innovative and sustainable solutions to complex challenges in the marine environment. With our headquarters in Florida, and additional offices in New York and Dubai, we are strategically located to serve clients worldwide.

Our team consists of highly skilled and experienced engineers, project managers, and technicians who are dedicated to delivering exceptional service and exceeding client expectations. We have a proven track record of delivering successful projects, and our reputation for technical excellence and client satisfaction is second to none.

At Atlantis Seawall, we are committed to creating a sustainable future by designing and building resilient coastal infrastructure that can withstand the impacts of climate change and sea level rise.

Atlantis Seawall Design Team

Atlantis Seawall Marine has extensive experience in the design of various types of marine structures such as breakwaters,

Atlantis Seawall, piers, offshore structures, and offshore wind farms. Our team of expert engineers utilizes the latest software

and modeling techniques to ensure that our designs are efficient, cost-effective, and sustainable. We use advanced 3D modeling software such as AutoCAD, Rhino, and Tekla Structures to create accurate and detailed designs for marine structures.

We have licensed professional engineers who are able to review and stamp drawings, ensuring that all designs are compliant with North American specifications or the jurisdiction where the project is located. This provides our clients with the peace of mind that their project is compliant and meets all necessary regulations and standards.

Our team understands that time is of the essence when it comes to designing marine structures. That is why we prioritize quick turnaround times without compromising quality. We have a proven track record of completing projects on time and within budget, while meeting or exceeding our clients' expectations.

If you are in need of marine structure design services, we encourage you to reach out to our expert team. We offer a range of services from concept design through to construction support and CQA services. Our team will work with you every step of the way to ensure that your project is a success. Contact us today for a consultation and quick turnaround for your project needs.

Partnering with Atlantis

Partnering with Atlantis Seawall means joining forces with a fast-growing, innovative and adaptable team. We bring together experienced professionals, advanced technology and industry-leading expertise to deliver cutting-edge marine engineering solutions. Our commitment to excellence, combined with our agility and adaptability, enable us to respond quickly to changing project requirements and provide customized solutions to meet our clients' specific needs. Our approach is collaborative, and we work closely with our clients to ensure that every project is delivered on time, on budget and to the highest standards. When you partner with Atlantis, you can be confident that you are working with a team that is committed to delivering exceptional results, every time.

Company Values

At Atlantis we hold our values in high regard, and they guide us in our approach to business. Our values underpin our commitment to delivering exceptional service and upholding high standards of professionalism in everything we do.

Integrity is at the core of our values, and we strive to always act with honesty and transparency in our dealings with

clients, partners, and stakeholders. We also believe in the importance of collaboration and teamwork, as we work together to achieve the best possible outcomes for our clients.

At Atlantis, we believe in continuous improvement, and we are committed to staying at the forefront of our industry by embracing innovation and cutting-edge technology. We are also committed to safety, both for our team and for the environment, and we take all necessary measures to ensure the safety and well-being of everyone involved in our projects.

Ultimately, at Atlantis, our values guide us in our mission to provide the highest quality engineering services and to create long-lasting relationships with our clients. We are dedicated to delivering results that exceed expectations and to building a reputation as a trusted and reliable partner in the industry

Services

Atlantis offers a wide range of engineering services related to coastal infrastructure, including the design and construction of seawalls, breakwaters, jetties, marinas, and docks. We also provide dredging and beach nourishment services to maintain and enhance existing coastal areas.

Our engineering expertise is complemented by our extensive knowledge of marine ecosystems and the regulatory environment. We work closely with our clients to develop solutions that meet their unique needs while minimizing environmental impacts and complying with regulatory requirements.

In addition, we offer project management and construction administration services to ensure that projects are completed on time and within budget, while maintaining the highest standards of safety and quality.

Maritime Engineering Services Across the Entire Project Lifecycle

At Atlantis our marine engineering services team, led by the industry's most talented practitioners, can help provide intelligent and innovative thinking to marine facilities, whatever their size or scale. We design ports, coastal and marine structures that help clients meet challenges such as climate change, ageing infrastructure, changing regulations, and embracing new market opportunities. Where necessary, our global port consultants supplement marine designs, integrating them with the adjacent intermodal connections, logistics management, landside infrastructure and our client's sustainability and resilience goals.

At Atlantis our teams provide innovative value-driven solutions for:

- ☒ Master planning
- ☒ Design of port and harbors
- ☒ Design of waterside marinas, waterfronts, beaches, quays, parks, seawalls and jetties
- ☒ New developments and additions to terminals and facilities
- ☒ Environmental assessments and monitoring
- ☒ Feasibility studies
- ☒ Coastal modelling and design
- ☒ Planning and design of both soft and hard coastal protection structures
- ☒ Dredging and reclamation projects
- ☒ Flood and erosion protection schemes
- ☒ Beach management programs
- ☒ Project management consulting, construction support and CQA Services

Complex engineering projects require expertise in regulation and permitting, maritime and port operations, structural and geotechnical engineering, site investigations, marine ecology, dredging and reclamation, project management, contract administration and site supervision. In addition, our clients can avail of our in-house expertise in various specialist areas, including modelling, flooding, ecology, marine biology, geotechnics, geomorphology, hydraulics, navigation, dredging & reclamation, and aquaculture.

As a multi-disciplinary consultancy, Atlantis can combine marine engineering with broader transport and infrastructure specialisms to deliver a holistic design and delivery service. With clients at the core of our service offering, we aim to add value thinking beyond the brief to deliver lasting impacts to clients and projects.

Master Planning and Design: We provide master planning services to ensure your marine facilities are optimally designed for your operations. Our team of experts will work with you to develop a comprehensive plan that takes into account all the necessary components, including regulatory requirements, environmental considerations, and sustainability goals.

Port and Harbor Design: Our port and harbor design services cover a wide range of marine infrastructure, from container terminals to passenger ports. We provide innovative solutions that improve the efficiency and safety of your operations, while also minimizing environmental impacts.

Waterfront and Marine Infrastructure Design: We specialize in designing marine infrastructure that meets the needs of a variety of clients, from waterfront developments to marinas and jetties. Our team of experts will work with you to design infrastructure that is both functional and aesthetically pleasing.

Terminal Development and Additions: Our terminal development services cover all aspects of the project, from planning and design to construction and commissioning. We have experience working on a wide range of projects, from small-scale additions to major terminal developments.

Environmental Assessments and Monitoring: We provide environmental assessments and monitoring services to ensure your project is compliant with all relevant regulations and standards. Our team of experts will conduct a thorough analysis of the environmental impacts of your project and develop strategies to mitigate any negative effects.

Feasibility Studies: Our feasibility studies provide a comprehensive assessment of the viability of your project. We will work with you to identify potential risks and opportunities and develop strategies to maximize the success of your project.

Coastal Modeling and Protection Design: We specialize in designing coastal protection structures that provide effective protection against erosion and flooding. Our team of experts uses state-of-the-art modeling techniques to ensure that your structures are both effective and cost-efficient.

Dredging and Reclamation Projects: We provide dredging and reclamation services that help you maintain or expand your marine facilities. Our team of experts uses the latest technology and techniques to ensure that your project is completed efficiently and with minimal disruption.

Flood and Erosion Protection: Our flood and erosion protection services help you minimize the risks associated with coastal flooding and erosion. We provide a range of solutions, from natural protection measures to engineered structures, that are tailored to your specific needs.

Beach Management Programs: We provide beach management services that help you maintain the health and safety of your beaches. Our team of experts can help you develop strategies to minimize erosion, improve water quality, and enhance the recreational value of your beaches.

Project Management and Support: We provide project management and support services that help you successfully complete your marine infrastructure projects. Our team of experts can provide support throughout the entire project

lifecycle, from planning and design to construction and commissioning.

Markets

Atlantis serves a wide range of markets, including commercial, industrial, and government clients. Our clients

include port authorities, municipalities, private developers, and engineering firms.

We have extensive experience working on projects of varying sizes and complexities, from small marina expansions to

large-scale port developments. Our expertise in coastal engineering and marine construction enables us to provide

customized solutions that meet the unique needs of each client and project experience extend across a wide variety of sectors, from commercial and industrial ports, to oil and gas, to the cruise

Atlantis offers innovative maritime engineering services to a diverse range of markets. Our expertise and

industry, to coastal and waterfront developments. Our clients benefit from our in-depth understanding of the unique

challenges and complexities of each market, as well as our ability to provide tailored solutions that address their specific needs.

Commercial and Industrial Ports

We provide comprehensive port engineering services, from master planning and design to project management and

construction support. Our expertise includes the planning and design of new ports, as well as the expansion and

modernization of existing facilities. We have worked with some of the largest ports in the world, helping them to

optimize their operations, increase efficiency, and enhance their environmental performance.

Oil and Gas

Our experience in the oil and gas industry includes the design and construction of marine structures, such as offshore

platforms, pipelines, and terminals. We are also well-versed in the unique challenges associated with this industry, such

as complex regulatory requirements, harsh environments, and the need for safety and reliability.

Cruise Industry

The cruise industry is a highly specialized market that requires a unique set of skills and expertise. We have worked on a

wide range of cruise projects, from new terminal designs to the expansion and refurbishment of existing facilities. Our

team understands the importance of delivering high-quality, innovative solutions that meet the unique needs of the

cruise industry, while also ensuring the safety and comfort of passengers and crew.

Coastal and Waterfront Developments

Our coastal and waterfront engineering services include the design and construction of seawalls, jetties, beaches, marinas, and other marine structures. We work closely with our clients to understand their goals and objectives, and we develop customized solutions that are both practical and sustainable. Our expertise includes the planning and design of both hard and soft coastal protection structures, as well as the management of beach and erosion programs.

At Atlantis, we are committed to delivering the highest quality maritime engineering services to all of our clients, regardless of the industry or sector. Our team of experienced professionals is dedicated to providing innovative solutions that meet the unique needs of each market, and we are always looking for new and better ways to deliver value to our clients. Contact us today to learn more about how we can help you with your next marine engineering project.

Contact Us

We would love to hear from you and learn more about how we can assist with your marine engineering and infrastructure needs.

Our team is ready to provide you with expert advice and answer any questions you may have regarding our services. We are committed to providing our clients with the highest level of customer service, and we take pride in responding to inquiries quickly and efficiently.

Please contact us at our headquarters in the US.

Thank you for considering Atlantis for your coastal engineering needs. We look forward to the opportunity to work with you.

Atlantis seawall GROUP

Marine Engineering & Construction Contractor

Atlantis Seawall Inc. provides a broad range of heavy civil marine engineering, construction and specialty services on, over, under and near the water.

Vision

To be the premier marine specialty engineering and construction company, focused on providing solutions for our customers across the infrastructure, industrial, and building sectors, while preserving a solid financial foundation and maximizing stakeholder value.

Core Values

☒ The guiding beliefs and core values of Atlantis are centered on Safety, Quality, Delivery, Teamwork, and, most importantly, Integrity, the all-important foundation. These values represent our commitment to each other. We will hold each other accountable to uphold these values across our organization.

Safety

- o We are responsible and accountable for our own personal
- o We are equally responsible and accountable for the safety of our co-workers and others around us.
- o We are authorized and obligated to stop work whenever an unsafe condition or situation is anticipated or is observed.

Quality

- o We take pride in our personal workmanship and that of the entire
- o We will verify our work and implement controls before each task, throughout execution, and before completion.
- o We are committed to ensuring that each task is properly and timely performed the first time.
- o We will continually improve upon everything we do, every
- o We will provide our customers with the highest achievable quality defined by our contract.

Delivery

- o We will safely perform assigned tasks in the most efficient and cost-effective manner.
- o We will learn from our mistakes and not repeat them.
- o We will plan our work and flawlessly execute.
- o We will proactively communicate, manage, and mitigate risks.
- o We will deliver on commitments and proactively communicate to our customers, our team, the Company.

Teamwork

- o Our people are our most important asset. We are committed to inspire, develop, train, reward, and retain our people.
- o We will relentlessly pursue success together as a team. We will work together, be fair, and help each other. One Team. One Mission.
- o Expect excellence from yourself, your peers, and others in the organization.
- o We promote a diverse and inclusive environment and treat everyone with dignity and respect.
- o We will be responsible and hold each other accountable for our actions.

Integrity

- o The foundation of our success rests upon Integrity. We view integrity as our ability to be honest, ethical, transparent, sincere, and forthright in our dealings with others. We will apply the foundation of integrity in everything we
- o Whenever we as individuals or the Company makes a commitment, that commitment must be kept.

Safety First

- The safety and well-being of every employee, customer, and stakeholder is paramount to our success.
- Our safety-through-leadership success is born out of a strong advocacy for accident prevention,

innovative training, and a proven track record of exceeding regulatory compliance. Being responsible and accountable is a priority for every employee, with special emphasis on performing every task safely, every time.

Experience

Atlantis provides a team of seasoned professionals who bring an unmatched depth of industry knowledge to every project we undertake. We work closely and collaboratively with customers to create solutions to exacting standards that achieve not only their immediate goals, including on-time completion, but also bring long-term value to their investment.

Marine Engineering & Consulting Group

Design

Each project has its own unique priorities and tasks. Our approach to your projects design is from a well-practiced program of communication protocols and design standards, which result in a design that not only meets the needs of the Owner but enhances them as well.

Through well-developed management skills, we endeavor to make a project flow smoothly from preliminary design, through regulatory review, trials, and onward to final delivery.

Consulting

Consulting Projects form a significant part of Atlantis Marine history. These projects often vary in scope and scale.

From the experience garnered while engineering these consulting projects, we have also improved our own designs. Our experience in this field allows our staff to foresee needed changes well before work is started, so that projects remain on time and within their budgets.

Adapting a physical change or modification to a marine project, bringing that project into compliance

with regulatory bodies, and meeting the needs of the customer, while maintaining the project's budgets,

are all challenges Atlantis Marine meets with continued success.

Marine Specialty Group Services

Atlantis Marine offers its customers an extensive range of specialty services knowledge and capabilities, including diving, inspections, repair, demolition, salvage, and surveying among others. Atlantis can meet even the toughest challenge and work with customers to find cost-effective, environmentally friendly solutions. Atlantis has an outstanding record of completing projects while building an excellent safety record.

Atlantis specialty services include the following activities:

- ☑ Commercial diving services

- ☑ Salvage operations

- ☑ Surveying to determine the suitability of sites for specific activities

- ☑ Inspections to ensure the greatest safety and practical support for damage caused by storms or other incidents

Port Facilities, Marine and Cruise Terminals

Atlantis Marine has an extensive track record in the engineering of port facilities, marine and cruise terminals. Whether the facility is for cruise ships, industrial and petrochemical import and export, or ferries and marinas, Atlantis has the experience to design, engineer this infrastructure to the highest possible standards of safety and quality. We consider all relevant factors, including the current and wave conditions in the area, the amount of traffic you expect and the overall location of your proposed port to allow you to make the most appropriate choices for your construction project

We have built a solid reputation for quality and on-time completions for a wide range of engineering and construction projects, including the following:

- ☑ Port Facilities

☒ Wharves

☒ Liquid Cargo Terminals

☒ Marinas

☒ Container Terminals

☒ Bulkheads

☒ Docks

☒ Cruise Ship Terminals

Maintenance & Repair

Atlantis Marine has established a strong reputation in the areas where we operate for providing rapid response call out repair and maintenance services for our client's facilities. Whether your facility has incurred damage or needs annual maintenance, Atlantis team is staffed with experts in completing this work as safely and efficiently as possible and with minimal impacts to ongoing operations.

Atlantis Marine typical maintenance and repair services include:

☒ Annual Surveys and Maintenance Work

☒ Marine Loading Arm Installation, Repair and Maintenance

☒ Fender Repairs and Replacement

☒ Mooring Facility Repair and Maintenance

☒ Bulkhead and Dock Repairs

☒ Terminal Concrete Repair and Installation

☒ Pipeline and Outfall Repairs

☒ Seawalls, Docks, Marinas, Piers

Maritime Military Installations

At Atlantis , we know that the demands of military facilities are significantly different from most

private or public entities. Our marine execution teams have worked in and around military installations across the USA and in the Caribbean and have gained a significant understanding of the regulations, requirements and complexities related to these projects. Our teams will work with you to make sure that every specification is met to your complete satisfaction and provides the certainty in the results required.

Safety First

The entire team at Atlantis Marine puts safety first when working on your military installation for marine construction projects. This will prevent unnecessary delays that result from accidents or injuries on the job and will allow you to enjoy the benefits of our outstanding on-time completion rate. Atlantis has built our company on delivering the highest standards of quality and the most practical options for all our customers.

Front Page

☑ Innovative Marine Engineering Solutions - Discover how Atlantis can provide value-driven solutions for your marine engineering project.

☑ Expert Coastal Engineering Services - From seawalls to marinas, our team of professionals can design and manage your coastal engineering project from start to finish.

☑ Global Presence, Local Expertise - With offices in Florida, New York, and Dubai, we bring our extensive experience and knowledge to projects around the world.

☑ Sustainable and Resilient Solutions - We prioritize sustainable and resilient solutions for our clients to ensure their projects withstand the test of time and changing conditions.

☑ Comprehensive Project Management - Our project management services can ensure your marine engineering project runs smoothly, from planning to execution and beyond.

Contact us today for a consultation and quick turnaround for your project needs.

Partnering with Atlantis seawall

Partnering with Atlantis seawall means joining forces with a fast-growing, innovative and adaptable team. We bring together experienced professionals, advanced technology and industry-leading expertise to deliver cutting-edge marine engineering solutions. Our commitment to excellence, combined with our agility and adaptability, enable us to respond quickly to changing project requirements and provide customized solutions to meet our clients' specific needs. Our approach is collaborative, and we work closely with our clients to ensure that every project is delivered on time, on budget and to the highest standards. When you partner with Atlantis you can be confident that you are working with a team that is committed to delivering exceptional results, every time.

Company Values

At Atlantis, we hold our values in high regard, and they guide us in our approach to business. Our values underpin our commitment to delivering exceptional service and upholding high standards of professionalism in everything we do.

Integrity is at the core of our values, and we strive to always act with honesty and transparency in our dealings with clients, partners, and stakeholders. We also believe in the importance of collaboration and teamwork, as we work together to achieve the best possible outcomes for our clients.

At Atlantis we believe in continuous improvement, and we are committed to staying at the forefront of our industry by embracing innovation and cutting-edge technology. We are also committed to safety, both for our team and for the environment, and we take all necessary measures to ensure the safety and well-being of everyone involved in our projects.

Ultimately, at Atlantis Marine, our values guide us in our mission to provide the highest quality engineering services and to create long-lasting relationships with our clients. We are dedicated to delivering results that exceed expectations and to building a reputation as a trusted and reliable partner in the industry.

Services:

Atlantis offers a wide range of engineering services related to coastal infrastructure, including the design and construction of seawalls, breakwaters, jetties, marinas, and docks. We also provide dredging and beach nourishment services to maintain and enhance existing coastal areas.

Our engineering expertise is complemented by our extensive knowledge of marine ecosystems and the regulatory environment. We work closely with our clients to develop solutions that meet their unique needs while minimizing

environmental impacts and complying with regulatory requirements.

In addition, we offer project management and construction administration services to ensure that projects are completed on time and within budget, while maintaining the highest standards of safety and quality.

Maritime Engineering Services Across the Entire Project Lifecycle

At Atlantis our marine engineering services team, led by the industry's most talented practitioners, can help provide intelligent and innovative thinking to marine facilities, whatever their size or scale. We design ports, coastal and marine structures that help clients meet challenges such as climate change, ageing infrastructure, changing regulations, and embracing new market opportunities. Where necessary, our global port consultants supplement marine designs, integrating them with the adjacent intermodal connections, logistics management, landside infrastructure and our client's sustainability and resilience goals.

At Atlantis our teams provide innovative value-driven solutions for:

- ☒ Master planning
- ☒ Design of port and harbors
- ☒ Design of waterside marinas, waterfronts, beaches, quays, parks, seawalls and jetties
- ☒ New developments and additions to terminals and facilities
- ☒ Environmental assessments and monitoring
- ☒ Feasibility studies
- ☒ Coastal modelling and design
- ☒ Planning and design of both soft and hard coastal protection structures
- ☒ Dredging and reclamation projects
- ☒ Flood and erosion protection schemes
- ☒ Beach management programs
- ☒ Project management consulting, construction support and CQA Services

Complex engineering projects require expertise in regulation and permitting, maritime and port operations, structural and geotechnical engineering, site investigations, marine ecology, dredging and reclamation, project management, contract administration and site supervision. In addition, our clients can avail of our in-house expertise in various

specialist areas, including modelling, flooding, ecology, marine biology, geotechnics, geomorphology, hydraulics, navigation, dredging & reclamation, and aquaculture.

As a multi-disciplinary consultancy, Atlantis can combine marine engineering with broader transport and infrastructure specialisms to deliver a holistic design and delivery service. With clients at the core of our service offering, we aim to add value thinking beyond the brief to deliver lasting impacts to clients and projects.

Master Planning and Design: We provide master planning services to ensure your marine facilities are optimally designed for your operations. Our team of experts will work with you to develop a comprehensive plan that takes into account all the necessary components, including regulatory requirements, environmental considerations, and sustainability goals.

Port and Harbor Design: Our port and harbor design services cover a wide range of marine infrastructure, from container terminals to passenger ports. We provide innovative solutions that improve the efficiency and safety of your operations, while also minimizing environmental impacts.

Waterfront and Marine Infrastructure Design: We specialize in designing marine infrastructure that meets the needs of a variety of clients, from waterfront developments to marinas and jetties. Our team of experts will work with you to design infrastructure that is both functional and aesthetically pleasing.

Terminal Development and Additions: Our terminal development services cover all aspects of the project, from planning and design to construction and commissioning. We have experience working on a wide range of projects, from small-scale additions to major terminal developments.

Environmental Assessments and Monitoring: We provide environmental assessments and monitoring services to ensure your project is compliant with all relevant regulations and standards. Our team of experts will conduct a thorough analysis of the environmental impacts of your project and develop strategies to mitigate any negative effects.

Feasibility Studies: Our feasibility studies provide a comprehensive assessment of the viability of your project. We will work with you to identify potential risks and opportunities, and develop strategies to maximize the success of your project.

Coastal Modeling and Protection Design: We specialize in designing coastal protection structures that provide effective protection against erosion and flooding. Our team of experts uses state-of-the-art modeling techniques to ensure that

your structures are both effective and cost-efficient.

Dredging and Reclamation Projects: We provide dredging and reclamation services that help you maintain or expand your marine facilities. Our team of experts uses the latest technology and techniques to ensure that your project is completed efficiently and with minimal disruption.

Flood and Erosion Protection: Our flood and erosion protection services help you minimize the risks associated with coastal flooding and erosion. We provide a range of solutions, from natural protection measures to engineered structures, that are tailored to your specific needs.

Beach Management Programs: We provide beach management services that help you maintain the health and safety of your beaches. Our team of experts can help you develop strategies to minimize erosion, improve water quality, and enhance the recreational value of your beaches.

Project Management and Support: We provide project management and support services that help you successfully complete your marine infrastructure projects. Our team of experts can provide support throughout the entire project lifecycle, from planning and design to construction and commissioning.

Markets:

Atlantis serves a wide range of markets, including commercial, industrial, and government clients. Our clients include port authorities, municipalities, private developers, and engineering firms.

We have extensive experience working on projects of varying sizes and complexities, from small marina expansions to large-scale port developments. Our expertise in coastal engineering and marine construction enables us to provide customized solutions that meet the unique needs of each client and project.

Atlantis offers innovative maritime engineering services to a diverse range of markets. Our expertise and experience extend across a wide variety of sectors, from commercial and industrial ports, to oil and gas, to the cruise industry, to coastal and waterfront developments. Our clients benefit from our in-depth understanding of the unique challenges and complexities of each market, as well as our ability to provide tailored solutions that address their specific needs.

Commercial and Industrial Ports

We provide comprehensive port engineering services, from master planning and design to project management and construction support. Our expertise includes the planning and design of new ports, as well as the expansion and

modernization of existing facilities. We have worked with some of the largest ports in the world, helping them to optimize their operations, increase efficiency, and enhance their environmental performance.

Oil and Gas

Our experience in the oil and gas industry includes the design and construction of marine structures, such as offshore platforms, pipelines, and terminals. We are also well-versed in the unique challenges associated with this industry, such as complex regulatory requirements, harsh environments, and the need for safety and reliability.

Cruise Industry

The cruise industry is a highly specialized market that requires a unique set of skills and expertise. We have worked on a wide range of cruise projects, from new terminal designs to the expansion and refurbishment of existing facilities. Our team understands the importance of delivering high-quality, innovative solutions that meet the unique needs of the cruise industry, while also ensuring the safety and comfort of passengers and crew.

Coastal and Waterfront Developments

Our coastal and waterfront engineering services include the design and construction of seawalls, jetties, beaches, marinas, and other marine structures. We work closely with our clients to understand their goals and objectives, and we develop customized solutions that are both practical and sustainable. Our expertise includes the planning and design of both hard and soft coastal protection structures, as well as the management of beach and erosion programs.

At Atlantis we are committed to delivering the highest quality maritime engineering services to all of our clients, regardless of the industry or sector. Our team of experienced professionals is dedicated to providing innovative solutions that meet the unique needs of each market, and we are always looking for new and better ways to deliver value to our clients. Contact us today to learn more about how we can help you with your next marine engineering project.
