## NGAP33135, 331-350/500 APU STAND A330, A340 and B777

### *One-Stand-Does-All! APU Transport, Storage, and Installation*

APU OEM Licensed 331-350/500 Stand saves time and money by eliminating the need for transfer slings and separate transportation, installation and storage stands! Universal, flexible design reduces MRO labor, tooling, and transport costs. Mixed fleet operators save even more by having only one interchangeable stand.

Easily change between the 331-350 and 331-500 configurations by unpinning the APU mounts and securing them to marked storage points. Quickly swap from transportation to installation mode using integral installation supports.

GreenStand® APU container, constructed from 100% Recycled plastic panels attached to an aluminum frame, replaces the standard wooden box which saves weight, resources, and creates demand for recycled materials. The panels fold and store on the stand when not in use, thus providing a smaller package to store or ship. This stackable stand reduces life-cycle cost and carbon footprint through its lower weight, volume, and freight costs.

*Shown in 131-9A Configuration with Optional Container and Casters*
