

cera-film®

SUPER FLEXIBLE FILM DISCS

Cera-Film Finishing Film Series are designed to remove dirt nibs, runs and other surface defects within the refinishing process.

Made of premium ceramic grain, which can provide excellent cutting performance. Their Special coating design helps reduce clogging.

The film backing allows the sanding disc to last longer and maintain high performance in wet environments. Film is much more durable than paper and will not tear easily.

They are specially designed to work with the cera-face soft interface pad to remove topcoat-sanding scratches effectively and efficiently.

Features:

Premium Ceramic Grain: Cera-Film Discs boast premium ceramic grain, ensuring excellent cutting performance for a wide range of applications.

Special Coating Design: The innovative coating design minimizes clogging, allowing the disc to maintain optimal performance throughout use.

Film Backing for Longevity: The film backing enhances the disc's lifespan, making it resilient and capable of delivering high performance, especially in wet environments.

Waterproof Function: Cera-Film Discs come with a waterproof feature, allowing for reliable performance even in wet environments. This makes them suitable for a variety of applications.

Size : 150 mm (6")

Grain : Ceramic

Backing : PET Film

Coating : Open Coat

Bond : Resin Over Resin

Grit : P800;P1000;P1200 & P1500

150mm 15 Hole

Part No	Diameter	Grit	Qty / Box
825010800	150mm / 6"	P800	50
825011000	150mm / 6"	P1000	50
825011200	150mm / 6"	P1200	50
