01 – COMPANY PROFILE

# About Cymru Drones

Cymru Drones is a **CAA-certified commercial drone services company** based in Llandudno Junction, North Wales. Founded by Paul Hyde — a licensed CAA remote pilot trained by Commercial Drone Training (CDT) — the company delivers safe, compliant, and cinematic aerial solutions for property, construction, events, and inspections.

Our mission is to provide businesses and individuals across **North Wales and North West England** with professional-grade aerial data collection and imaging services, conducted with the highest regard for public safety, property protection, and airspace integrity.

Every operation is backed by comprehensive risk assessments compliant with **UK CAA CAP 722** regulations, £5 million commercial liability insurance, and a rigorous 12-point pre-flight safety protocol. We are proud members of North Wales Tourism, supporting the region's growth through innovative aerial perspectives.

Working closely together we're here to safely provide exceptional video and images of your hotel, construction site, sports facility or real estate project.

WHAT WE DO

# Our Services

## Aerial Photography & Videography

Cinematic 4K footage and high-resolution stills for marketing, documentation, and creative projects

## Real Estate & Property Surveys

Elevated perspectives for property marketing, valuations, and land boundary documentation

## Roof & Infrastructure Inspections

Safe, non-invasive video and imagery

## 3D Mapping & Surveying

Orthomosaic maps, point cloud data, and digital elevation models for construction and planning

## Event Coverage

Weddings, festivals, corporate events, and sporting occasions captured from stunning aerial angles

## In House Editing

In house editing to create your look and various format deliverables for facebook, insta etc

CLIENT OUTPUTS

# What We Deliver

## 4K Video Files

MP4 / MOV

Cinematic aerial footage captured in ultra-high definition, colour-graded and ready for marketing, social media, or archival use

## High-Resolution Stills

RAW / JPEG

Professional-grade aerial photographs delivered in both editable RAW and print-ready JPEG formats at full sensor resolution

## 3D Models

.OBJ / .DXF

Photogrammetry-generated three-dimensional digital models suitable for CAD integration, planning applications, and visualisation

## Orthomosaic Maps

GEOTIFF / PDF

Georeferenced composite aerial maps stitched from hundreds of overlapping images, accurate to centimetre-level precision

## Point Cloud Data

.LAS / .PLY

Dense three-dimensional spatial datasets for volumetric analysis, terrain modelling, and construction progress monitoring

## Roof Condition Video & Images

PDF REPORT

Comprehensive inspection documentation with annotated imagery and video.
