

“Clarifying the Dogma and Misnomers of Science, Medicine & Food Chemistry ”

By Victor Muhammad. PHD,
MS.BS.

Part 1

In the Name of Allah ...

As Salaam Alaikum!

My desire would have been to send this document on LSOW, Inc.'s Letterhead. However, as of this moment, it is not in my possession.

In the past several months, I have been in receipt of information regarding the sale of a product that is to be the same as the IB-100. It is unclear in the instant whether there has been an actual claim made by the owners of said product thus, actually comparing or contrasting said product to

IB-100.

My position has been - and, until instructed otherwise - to not respond to the presence of said "similar" product. I am a student of history and have seen the scenario in the current environment, played out multiple times throughout recent history.

As such, I fear that this too could be yet another ploy by the satan to cause death or destruction among members of the Original People. My goal is not to be a character in such a play.

I am asking all people who are associated with me or the IB-100, not to entertain any discussions regarding any other "similar" products. If any action from those persons require a response, then I will respond.

The greatest proponent of the

misinformation being lodged in the public domain has at least a 31 year history of this conduct. In the last 31 years, I have personally cautioned him regarding some public comments that he has made regarding science and health-related issues. His pig-headedness has sustained a following that supports his nonsense and places no requirements on him to substantiate his claims.

Therefore, I ask you to be patient and allow the natural process to take place regarding this character.

I thank you -

Victor Muhammad
