Aftermarket Break Out Table Jaw, replaces Epiroc P/N 3222 3285 51

Discover the Oak's Manufacturing Difference:

Our Generation 2 breakout table jaws are designed to exceed typical OEM performance standards:

- **Solid one-piece construction** — no welds to chip, crack, break, or cause part distortion.
- **Proprietary heat-treat process** — achieves higher Rockwell hardness than seen with most OEMs, without case hardening, ensuring consistent hardness throughout each contact “ball”.
- **Durable and reliable** — built to withstand the toughest conditions in the field!
