TIME RECTIFICATION: A TECHNICAL COURSE

DURATION: 4 Months

FORMAT: 2-hour live class per week (via Zoom)

FRAMEWORK: Tropical Placidus

SOFTWARE: Solar Fire

LEVEL: Intermediate to Advanced

OVERVIEW

This 4-month training introduces a structured approach to birth time rectification.

The course focuses on developing accuracy through method – working with timing, chart structure, and lived events to refine a birth time with consistency.

It is designed for astrologers who are already comfortable reading charts and want to work more precisely with timing.

WHAT YOU'LL GAIN

- A structured rectification framework
- Greater accuracy in working with timing
- Confidence applying rectification within chart analysis

IDEAL FOR

Astrologers who:

- Already work with charts, transits, and timing techniques
- Want to refine accuracy rather than expand interpretation
- Are ready to approach astrology in a more technical way

MODULE 1 – FOUNDATIONS OF RECTIFICATION

Establish the role of rectification within predictive astrology and the principles that underpin the process.

Outcome: A clear understanding of the framework and required tools.

MODULE 2 – CHART STRUCTURE AND RULERSHIP

Develop a working approach to chart angles, houses, and their role in timing.

Outcome: Confidence working with core chart components in a rectification context.

MODULE 3 – EVENT SELECTION AND PREPARATION

Learn how to identify and organise relevant life events for rectification work.

Outcome: A structured dataset ready for analysis.

MODULE 4 – TIMING AND CALCULATION

Work with the numerical side of rectification, translating time into measurable movement.

Outcome: Ability to calculate and manage timing data accurately.

MODULE 5 – APPLICATION

Apply the rectification process step by step using selected events.

Outcome: A refined birth time based on structured testing.

MODULE 6 – TESTING AND REFINEMENT

Assess and adjust results across multiple events to improve reliability.

Outcome: A consistent and tested rectification process.

MODULE 7 – EVALUATION AND INTEGRATION

Finalise results and establish a repeatable working method.

Outcome: A documented approach suitable for ongoing use.
